

# Brighton 3-7 July 2011

## International Symposium on Macrocyclic & Supramolecular Chemistry

### Oral abstract deadline - 28 January 2011

The 6th International Symposium on Macrocyclic and Supramolecular Chemistry (6-ISMSC) will cover all aspects of macrocyclic and supramolecular chemistry. It will bridge the traditional core areas of chemistry and interface with biological, nanotechnological and materials arenas. The meeting will include a mix of established and younger speakers and will offer the chance for students to present their work in the form of short oral presentations and posters.

#### Themes

- Imaging and sensing
- Molecular machines and self-assembly
- Macrocycles in the 21st Century
- Biological supramolecular chemistry
- Systems chemistry and complexity
- Functional materials and devices

#### Key Deadlines

Oral abstract submission 28 January 2011

Poster abstract submission 29 April 2011

Early bird registration 29 April 2011

Standard registration 3 June 2011

**Plenary lectures will be presented by the winners of the following awards.**

#### International Izatt-Christensen Award

This award bears the names of the founders of the first International Symposium on Macrocyclic Chemistry. It is awarded annually to a leading macrocyclic chemist at the International Symposium on Macrocyclic and Supramolecular Chemistry.

#### Bob Hay Lectureship

This lectureship is awarded by the RSC Macrocyclic and Supramolecular Chemistry Group in memory of Bob Hay, one of the pioneers of macrocyclic chemistry in the UK.

This prestigious lectureship is given to a younger chemist working in the area of macrocyclic and/or supramolecular chemistry in its widest sense.

#### Cram Lehn Pedersen Prize - Sponsored by ChemComm

The International Organising Committee of the International Symposium on Macrocyclic and Supramolecular Chemistry is pleased to announce the inauguration of a new annual international prize for young supramolecular chemists. The Cram Lehn Pedersen prize, named in honour of the winners of the 1987 Nobel Prize in Chemistry, will recognise significant and original work in supramolecular chemistry conducted independently by a supramolecular chemist.

#### The winner of the Supramolecular Chemistry Award 2010 is Professor Neil Champness, University of Nottingham, UK

Professor Champness will deliver his award lecture at 6-ISMSC. This biennial award is presented by the RSC in recognition of studies leading to the design of functionally useful supramolecular species.

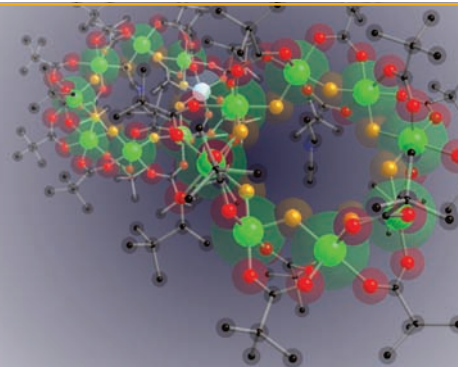

**Full details of plenary lectures and keynote speakers can be found on our website**

**Submit your abstract NOW and register early to take advantage of discounts**

# EICC-1: First EuCheMS Inorganic Chemistry Conference

11 - 14 April 2011

University of Manchester, UK

## Poster and early bird deadline - 4 February 2011

The Dalton Division of the RSC is joining together with the EuCheMS Inorganic Division (EID) to host the first edition in a new European conference series in Inorganic Chemistry.

Inorganic Chemistry is a buoyant subject area with major developments being seen in all branches of the subject and common themes emerging; this timely conference arranged across parallel sessions brings all these themes together.

## Themes and Plenary Speakers

Supramolecular and  
co-ordination chemistry

**Paul Beer**

*University of Oxford, UK*

Organometallic and catalysis

**Sylviane Sabo-Etienne**

*Laboratoire de Chimie de Coordination  
du CNRS, Toulouse, France*

Reaction mechanisms

**Pablo Espinet**

*University of Valladolid, Spain*

Inorganic materials

**Reshef Tenne**

*Weizmann Institute of Science, Israel*

Energy and photochemistry

**Leif Hammarström**

*Uppsala University, Sweden*

Bioinorganic and metallic enzymes

**Claudio Luchinat**

*University of Florence, Italy*

Main group

**Markku Räsänen**

*University of Helsinki, Finland*

Solid state chemistry

**Martin Jansen**

*Max Planck Institute for Solid State  
Research, Germany*

## Key Deadlines

Poster abstract submission

4 February 2011

Early bird registration

4 February 2011

Standard registration

4 March 2011

**Submit your abstract NOW  
and register early to take  
advantage of discounts**
