Residential School: Medicinal Chemistry 2011

4-8 July 2011 – Loughborough University

Registration deadline – 13 May 2011

July 2011 welcomes the return of the RSC Residential School in Medicinal Chemistry, held at Loughborough University.

Following the success of the past 30 years, this popular biennial course aims to highlight the current understanding of factors governing modern drug discovery, focusing on general principles and providing case histories.

Primarily aimed at graduate and post doctoral chemists with 1-4 years experience in the field of drug research, but also of interest to final year PhD students in pharmacy and organic chemistry contemplating a career in medicinal chemistry, this school provides a series of lectures from experts in the field together with tutorials covering the main themes of the course.
