

The RSC Nanoscience & Nanotechnology Series

**NEW
Second
Edition**

Fullerenes

Fernando Langa De La Puente, Universidad de Castilla-La Mancha, Spain
Jean-François Nierengarten, Université de Strasbourg, France
ISBN: 9781849731362 | Price: £144.99

This fully revised new edition is an up-to-date survey of the research areas of carbon nanotubes, inorganic nanotubes and nanowires including synthesis, characterisation, properties and applications. An ideal resource both for graduates needing an introduction to the field of nanomaterials as well as for professionals and researchers in academia and industry.

Nanoparticles in Anti-Microbial Materials

Fiona Regan, James Chapman and Timothy Sullivan
Dublin City University, Ireland
ISBN: 9781849731591 | Price: £132.99

This book documents the most up-to-date research on the area of nanoparticles showing anti-microbial activity and discusses their preparation and characterisation. With its user-friendly approach to applications, this book is an excellent reference for practical use in the lab and technology, where phage-derived nanomaterials can be most beneficial.

Biological Interactions with Surface Charge in Biomaterials

Tofall Syed, University of Limerick, Ireland
ISBN: 9781849731850 | Price: £121.99

This book is the first to comprehensively address the complex phenomenon of biological interactions with the surface charge of biomaterials.

Nanoporous Gold

Arne Wittstock, Marcus Bäumer, University of Bremen, Germany
Jürgen Biener, Lawrence Livermore National Laboratory, USA
Jonah Erlebacher, Johns Hopkins University, USA
ISBN: 9781849733748 | Price: £132.99

Provides a broad, multi-disciplinary platform to discuss and learn more about the fascinating properties of nanoporous gold from an inter-disciplinary perspective.

This book series covers the wide ranging areas of Nanoscience and Nanotechnology. In particular, the series provides a comprehensive source of information on research associated with nanostructured materials and miniaturised lab on a chip technologies. Titles are intended to provide an accessible reference for professionals and researchers in academia and industry and all are fully referenced to primary literature.

Series Editors:

Harry Kroto FRS,
Florida State University, USA

Paul O'Brien
Manchester University, UK

Ralph Nuzzo
University of Illinois at Urbana-Champaign, USA

Joao Rocha
University of Aveiro, Portugal

Xiaogang Liu
National University of Singapore, China

New for 2012

Manipulation of Nanoscale Materials

Katsuhiko Ariga, NIMS, Japan
ISBN 9781849734158 | Price £153.99

Fully referenced to the primary literature, this title presents an excellent source of information, and inspiration, to the reader and should appeal to experienced materials scientists, nanotechnologists and postgraduate students.

Towards Efficient Designing of Safe Nanomaterials

Jerzy Leszczynski, Jackson State University, USA | Tomasz Puzyn, University of Gdansk, Poland
ISBN 9781849734530 | Price £153.99

This book is the first to provide a comprehensive review of recent progress and challenges in the risk assessment of nanomaterials by empirical and computational techniques.

RSC Nanoscience and Nanotechnology Series Package

- Includes 10 leading series titles
- Comprehensive source of information
- Cutting-edge developments in research

SAVE 35% on the individual purchase price of these leading series titles – purchase as one complete package!

To order any of these titles please email booksales@rsc.org or visit the website!

The RSC Drug Discovery Series

Biomarkers for Traumatic Brain Injury

Edited by Svetlana Dambinova, Kennesaw State University, USA | Ronald L. Hayes, Kevin K. W. Wang, Banyan Biomarkers, Inc, USA

Examines current and prospective biomarkers for assessment of TBI using a multidisciplinary approach involving biochemistry, molecular biology and clinical chemistry.

ISBN: 9781849733892 Price: £109.99

Physico-Chemical and Computational Approaches to Drug Discovery

Edited by F. Javier Luque and Xavier Barril, University of Barcelona, Spain

Provides an updated review of the methodological basis of tools used to decipher ligand-receptor interaction and modelling of biomolecular systems and drug discovery.

ISBN: 9781849733533 Price: £153.99

Drug Design Strategies: Computational Techniques and Applications

Edited by Timothy Clark and Lee Banting, University of Portsmouth, UK

This comprehensive book shows how different parts of the drug discovery and design process have developed with a particular emphasis on computer-aided drug design.

ISBN: 9781849731676 Price: £139.99

Kinase Drug Discovery

Edited by Richard A Ward and Frederick W Goldberg, AstraZeneca, UK

This is the first book to examine the future opportunities and challenges in the development of drugs which target kinases.

ISBN: 9781849731744 Price: £132.99

The RSC Drug Discovery Series is a suite of professional reference books that will encourage learning on a range of different topics and provide understanding to scientists working outside of their own areas of expertise. The competitive advantage of the series is that it will follow an idea through to totality with an emphasis on learning and critical evaluation.

Editor-in-Chief:

Professor David Thurston
London School of Pharmacy, UK

Series Editors:

Dr David Fox
Pfizer Global R & D, UK

Professor Salvatore Guccione
University of Catania, Italy

Professor Ana Martinez
Medicinal Chemistry
Institute-CSIC, Spain

Professor David Rotella
Montclair State University, USA

Advisor to the Board:

Professor Robin Ganellin
University College London, UK

Forthcoming

Nanostructured Biomaterials for Overcoming Biological Barriers

ISBN: 9781849733632 | Price: £144.99

This book provides a critical overview of the advances being made towards overcoming biological barriers through the contribution of nanosciences and nanotechnologies.

Drug Discovery from Natural Products

ISBN: 9781849733618 | Price: £159.49

An integrated review of the most recent trends in natural products drug discovery and key lead candidates that are outstanding for their chemistry and biology in novel drug development.

Computational Approaches to Nuclear Receptors

ISBN: 9781849733649 | Price: £134.99

The aim of this book is to provide a state-of-the-art review on investigations into modeling nuclear receptors, looking at strengths, weaknesses and the limitations of the approaches.

Whilst every effort was made to ensure these prices were correct at the time of going to press, all information is subject to change without notice.
