Aims and scope

An interdisciplinary journal on the physics, chemistry, and engineering of materials with applications to organic electronics and optoelectronics, **Organic Electronics** is a primary journal for physicists, material scientists and chemists who are interested in organic electronic devices such as organic light emitting diodes, thin film transistors, photovoltaic cells, etc. Papers suitable for publication in this journal cover such topics as photoconductive and electronic properties of organic materials, film growth and characterization, organic electronic and optoelectronic devices, and applications.

As an important Journal **Organic Electronics** can ensure that your most significant research receives the recognition that it deserves. As a unique publication outlet, uniting the various research disciplines involved, it provides the only forum for both applied and fundamental contributions spanning the many different disciplines addressing electronic applications of organic materials.

Abstracted/indexed in:

Current Contents: Engineering, Technology and Applied Sciences; El Compendex Plus; Engineering Index; INSPEC; Physics Briefs; Science Citation Index, expanded; Chemistry Citation Index; Current Contents: Physics, Chemistry and Engineering Science.

Publication information: Organic Electronics (ISSN 1566-1199). For 2004, Volume 5 is scheduled for publication. Subscription prices are available upon request from the Publisher or from the Regional Sales Office nearest you or from this journal's website: (http://www.elsevier.com/locate/orgel). Further information is available on this journal and other Elsevier products through Elsevier's website: (http://www.elsevier.com). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.
