Pd(0)-Catalyzed Iodoalkynylation of Norbornene Scaffolds:  
The Remarkable Solvent Effect on Reaction Pathway

Page 5073. In Table 1, the value referring to the ratio of **3a** to **4a** has been transposed. Accordingly, the ratio of **3a** to **4a** for the first trial should be 40:60 (Table 1, entry 1); the ratio of **3a** to **4a** for the second trial should be 28:72 (Table 1, entry 2).
