

Correction to Three-Component Organocascade Kinetic Resolution of Racemic Nitroallylic Acetates via Sequential Iminium/Enamine Asymmetric Catalysis

Suparna Roy and Kwunmin Chen*

Org. Lett. 2012, 14 (10), 2496–2499. DOI: 10.1021/ol300783e

Supporting Information

The absolute stereochemistry in the recovered nitroallylic acetates (*R*)-**1a–f** of the above paper was reported incorrectly in the original article and the Supporting Information. The correct absolute stereochemistry of the recovered substrates should be (*S*)-**1a–f**. Therefore, correction of the chemical structure should be made as (*S*)-**1a–f** in Table of Contents, graphical abstract, Tables 1 and 2, and Scheme 2.
