Page 980. In the fourth paragraph, after the first sentence, a new sentence should be added: Greaney was the first to isolate a quaternary ammonium salt after arylation using this mild reagent to produce a benzyne.¹⁰ His chemistry was then used by other groups to develop additional arylation followed by subsequent reactions, and as described above, quaternary ammonium salts were obtained as byproducts or isolated to study the reaction mechanism.^{11a,b,18}
