

## Correction to A Streamlined Process for the Conversion of Artemisinin to Artemether

Rodger W. Stringham and David S. Teager\*

*Org. Process Res. Dev.* 2012, 16, 764–768; 10.1021/op300037e

$\beta$ -Artemether

The structure for  $\beta$ -artemether is shown above, with the correct stereochemistry shown at the anomeric (8a) position. Assignments are correct for the  $\alpha$ - and  $\beta$ -anomers of artemether and dihydroartemisinin as discussed in the text; only the structure drawings are in error.
