Preface

This issue of the Journal is dedicated to Professor Charles G. Overberger on the occasion of his sixtieth birthday. These papers constitute but a small token of the high esteem we have for CGO, as he is affectionately known to his students. It is a most fitting tribute to an outstanding teacher and a valued and respected colleague. His dedication to his work and his integrity, both as a scientist and as a human being, have served as standards for us all. But perhaps his most important contribution has been his continued and unswerving friendship to his coworkers as scientists and as people.

We all formulate our best wishes for many more years of health and continued leadership. We hope that this special issue will translate at least in part the devotion and admiration of all his colleagues.

HAPPY BIRTHDAY, Charlie!

Boston, October 12, 1980

J.-P. Anselme
