## INFORMATION FOR AUTHORS

The Royal Society of Chemistry welcomes submission of manuscripts intended for publication in two forms, Articles and Materials Chemistry Communications. These should describe original work of high quality dealing with the synthesis, structures, properties and applications of materials, particularly those associated with advanced technology.

### Articles

Full papers contain original scientific work that has not been published previously. However, work that has appeared in print in a short form such as a Materials Chemistry Communication is normally acceptable. Four copies of Articles including a top copy with figures *etc.* should be sent to The Editor, *Journal of Materials Chemistry*, The Royal Society of Chemistry, Thomas Graham House, Science Park, Milton Road, Cambridge CB4 4WF, UK.

### Materials Chemistry Communications

Materials Chemistry Communications contain novel scientific work in short form and of such importance that rapid publication is warranted. The total length is rigorously restricted to two pages of the double-column A4 format. The manuscript will be returned for reduction if this length is exceeded. For a Communication consisting entirely of text and ten references, with no figures, equations or tables, this corresponds to approximately 1600 words plus an abstract of up to 40 words.

Submission of a Materials Chemistry Communication can be made either to The Editor, *Journal of Materials Chemistry*, The Royal Society of Chemistry, Thomas Graham House, Science Park, Milton Road, Cambridge CB4 4WF, UK, or *via* a member of the International Advisory Editorial Board. In the latter case, the top copy of the manuscript including any figures *etc.*, together with the name of the person to whom the Communication is being submitted, should be sent simultaneously to the Editor at the Cambridge address. Authors may wish to contact the Board member to ensure that he is available to arrange review of the manuscript within reasonable time.

In order to avoid delay in publication, proofs of Communications are not sent to authors unless this is specifically requested.

Full details of the form of manuscripts for Articles and Materials Chemistry Communications, conditions for acceptance *etc.* are given in issue number one of *Journal of Materials Chemistry* published in January of each year, or may be obtained from the Staff Editor.

There is no page charge for papers published in *Journal of Materials Chemistry*. Fifty reprints are supplied free of charge. Any author who is publishing in *Journal of Materials Chemistry* for the first time is entitled to a free copy of the issue in which the paper appears.
