

## Additions and Corrections

---

William J. Sartain and John P. Selegue\*: Early-Late Transition Metal Bonds: Ruthenium-Titanium Compounds with Aryloxy Ligands. 1989, 8, 2153.

In the discussion of bonding on page 2158, column 2, we should have stated that "A similar  $\sigma$ -based explanation could explain the shorter metal-metal bond in 4, since aryloxides are *more* electronegative than amides."

Louis S. Hegedus,\* Lisa M. Schultze, and John Montgomery: Synthesis and Properties of (*O*-Acyl imidato)-carbene Complexes of Chromium, Molybdenum, and Tungsten. 1989, 8, 2189.

Reference 15 should read as follows.

(15) (a) Yang, D. C.; Dragisch, V.; Wulff, W. D.; Huffman, J. C. *J. Am. Chem. Soc.* 1988, 110, 307 and references therein. (b) Fischer, H.; Seitz, F.; Müller, G. *J. Organomet. Chem.* 1987, 320, 185 and references therein.

The citation in ref 16 should read as follows.
