

Additions and Corrections

Teresa A. Wark and Douglas W. Stephan*: Early Metal Thiolato Species as Metalloligands in the Formation of Early/Late Heterobimetallic Complexes: Syntheses and Molecular Structures of $\text{Cp}_2\text{Ti}(\text{SMe})_2$, $\text{Cp}_2\text{V}(\text{SMe})_2$, $(\text{Cp}_2\text{Ti}(\mu\text{-SMe})_2)_2\text{Ni}$, and $(\text{Ni}(\mu\text{-SMe})_2)_6$. 1989, 8, 2836–2843.

The crystal structure of molecule 1 was previously reported as stated in ref 14b. The inclusion of our structural results was not to imply inaccuracy in the initial report but rather was included solely for comparison to the structures reported for molecules 2, 3, and 6.
