Jenkins Y. K. Tsang, Miriam S. A. Buschhaus, Peter Legzdins,* and Brian O. Patrick: Ortho-Selective C–H Activation of Substituted Benzenes Effected by a Tungsten Alkylidene Complex without Substituent Coordination

Page 4220. During the discussion of our results, we should have noted explicitly that other systems also exhibit thermodynamic selectivity for ortho C–H activation of fluorobenzene and that this selectivity has been attributed to the formation of stronger M–C bonds. See: Clot, E.; Oelckers, B.; Klahn, A. H.; Eisenstein, O.; Perutz, R. N. *Dalton Trans.* **2003**, 4065 and references therein.
