

Additions and Corrections

2008, Volume 27

Noriyoshi Nagahora, Takahiro Sasamori, and Norihiro Tokitoh*:
A Ferrocenyldiphosphene–Platinum Complex: Structural Features and Theoretical Calculations

Pages 4265–4268. In the introduction, the first paragraph seems to contain somewhat misleading expressions. We wish to add refs 3q and 3r at the end of the first paragraph as shown:

(q) Niecke et al. have reported the spectral observation of the first ferrocenyldiphosphene, $\text{Mes}^*\text{P}=\text{PFc}$, which undergoes a ready dimerization under ambient conditions.⁸(r) Moser, C.; Nieger, M.; Pietschnig, R. *Organometallics* **2006**, *25*, 2667–2672.

In ref 8, the name of the first author was misspelled; it should appear as shown:

Pietschnig, R.; Niecke, E. *Organometallics* **1996**, *15*, 891–893.
