AAPS 40th Annual Pharmaceutical Technologies Conference at Arden House: Pharmaceutical Materials Science—From Drug Substance to Drug Product

January 23-28, 2005
Arden House Conference Center
Harriman, NY

Goals of the meeting include: To provide first an elementary and then an advanced overview of material science issues related to pharmaceutical solids. Discuss the various techniques used to characterize pharmaceutical solids, and discuss the advantages, limitations and sensitivity of each technique. Develop an understanding of particulate properties and approaches to particle engineering. Find the implications of (a) physical form of the drug on processing, and (b) processing on the physical form. The specific interests are the effects of mechanical, solvent and thermal stress. Effects of physical form on product performance, including the biological implications. Intellectual property issues associated with the physical form (to be presented by patent attorneys in the form of case studies), and regulatory issues (to be presented by a panel of speakers from FDA)
