

# AAPS Update

AAPS — YOUR FORMULA FOR SUCCESS!

September 2006

## AAPS Workshop on Real World Applications of PAT and QbD in Drug Process Development and Approval Workshop

Co-sponsored with FDA and PhRMA

September 11–12, 2006

Hyatt Regency Crystal City, Crystal City, VA

### Goals and Objectives

The U.S. Food and Drug Administration took a proactive approach to bring a scientific and risk-based framework founded on pharmaceutical process understanding, which is essential for prediction of product quality attributes. As a result of this proactive approach, PAT and QbD initiatives gained momentum amongst the pharmaceutical scientists. However, there seems to be little clarity on how to implement the concepts of PAT and QbD in real world applications, to get drug applications approved by the agency. Although many events (in the form of symposiums and workshops, etc) have been organized to address these issues, we believe none of the programs were directed at showing case examples of PAT and QbD in new drug applications and the feedback for streamlining the process. Industry is eager to understand the risk/benefits and especially the return on investments by applying PAT and QbD. This workshop is geared to provide discussion on these topics.

## AAPS Workshop on Challenges in Developing Fixed-dose Combination Oral Solid Dose Products

September 13–14, 2006

Hyatt Regency Crystal City, Crystal City, VA

### Goals and Objectives

Combination products are becoming increasingly important, both as new products and as line extensions of approved products for synergistic therapeutic effects and/or to improve patient compliance. Oral solid dosage-form comprises

the vast majority of pharmaceutical dosage forms. Developing combination oral solid dose products presents a set of unique challenges arising from stability, process development, and mechanical properties of the constituents. Given the growing number of combination products in development pipelines, and the meager amount of published information on the challenges in developing these products, there is a need for a forum for elucidating and discussing these challenges and means to address them. This workshop will:

- ▶ provide an in-depth discussion of the formulation, process development, and stability challenges in developing fixed-dose combination products of oral solid dosage forms, both as new products or as line extensions of approved products;
- ▶ discuss approaches for addressing the complexities in co-formulating chemically incompatible drugs, and drugs with different mechanical properties in a single unit dose, and the associated processing and biopharmaceutic challenges with case studies from industry;
- ▶ discuss registration of combination products with industry and regulatory perspective; and
- ▶ present marketing and intellectual property considerations in developing combination products.

The overall objective of the workshop is to provide a comprehensive overview of the challenges in developing and registering combination products, and practical approaches in addressing some of the formulation and process development challenges.

## 2<sup>nd</sup> Joint AAPS/AAVPT/CRS Workshop on Collaboration in the Research and Development of Veterinary Pharmaceuticals

Co-sponsored with AAVPT, CRS and USP

October 27–29, 2006

Henry B. Gonzalez Convention Center San Antonio, Texas

The number of people employed in the animal health industry, regulatory agencies and the related scientific researchers are relatively small, and few meetings

Continued

dedicated to animal medicinal product development occur. This meeting brings together pharmaceutical and veterinary scientists to share development issues and bridge the gap between these two fields. The meeting provides educational opportunities for scientists to broaden their understanding of animal health product development, and as a forum for open discussion. The final session of this workshop will focus on the new field of *in-vitro in-vivo* correlation for veterinary species; this will be a springboard for future meetings and debates on this topic.

### Goals and Objectives

This workshop will:

- ▶ bring together pharmaceutical scientists and veterinary pharmacologists to discuss areas of mutual interest;
- ▶ provide a forum in which research, current issues and future objectives and directions in veterinary medicine can be presented and discussed; and
- ▶ disseminate information to promote and further enhance the interdisciplinary approach to animal health product research and development

## AAPS Workshop on Applications of Ion Chromatography in Pharmaceutical Drug Analysis

Co-sponsored with ALA

October 27–29, 2006  
Henry B. Gonzalez Convention Center  
San Antonio, Texas

Although there is already a strong interest in the biotechnology industry for IC, the interest in this pharmaceutical area is still growing and is expected to grow steadily over the next few years. Several factors, including the potential of being complementary to the conventional forms of HPLC such as RP or NP, orthogonal to techniques of metal ion analysis such as ICP and AA, a safer and low cost operation for not having to use organic solvents, and expiration of certain key patents held by the innovator company a few years ago has opened the potential of rapidly increasing applications of IC in pharmaceutical drug analysis. The number of USP monographs that include IC-based procedures is low but is increasing steadily. USP plans to have a new general information chapter on Ion Chromatography and at least one more general chapter on an IC-based procedure. Given all these key factors, the timing of this meeting will be ideal for pharmaceutical industry to discuss the technology and explore its potential for application in drug analysis.

## Plan Now for the 2006 AAPS Annual Meeting and Exposition

Plan ahead to join over 8,500 pharmaceutical scientists from every corner of the globe who will be promoting breakthrough research and technologies, networking with colleagues, and improving their professional edge at the 2006 AAPS Annual Meeting and Exposition, October 29–November 2, 2006 at the Henry B. Gonzalez Convention Center, San Antonio, Texas. More than 550 companies are expected to showcase the latest equipment, technical developments, publications, and other services for the pharmaceutical scientist. Find both new and current suppliers of the equipment, services, and techniques you need for your most pressing needs. An Exhibit Guide will be available on site for all attendees and will feature detailed descriptions of exhibiting company's contact information, products and services, plus an index of the companies by product category. This guide to the Exposition will also serve as a valuable reference after the meeting.

### Register for the 2006 AAPS Annual Meeting and Exposition as a Group

Take advantage of this opportunity to register you and your colleagues for this meeting and save hundreds of dollars! Group registration discounts apply as follows:

- ▶ Three fully paid registrations qualify for one additional complimentary registration
- ▶ Five or more fully paid registrations qualify for two additional complimentary registrations

Registration must be in groups of three or more paid registrants, from the same organization and cannot be combined with any additional offer. Group registrations are not valid after October 6, 2006 and are available through online registration only. All registrations must be made at the same time to qualify. Not available for exhibitor or one-day registrants.

Registration is now open at [www.aapspharmaceutica.com/annualmeeting](http://www.aapspharmaceutica.com/annualmeeting)

### Upcoming AAPS Meetings

Log onto [www.aapspharmaceutica.com/meetings](http://www.aapspharmaceutica.com/meetings) for details.

#### ▶ September, 11-12, 2006

AAPS Workshop on Real World Applications of PAT and QbD in Drug Process Development and Approval  
Co-sponsored with FDA and PhRMA  
Hyatt Crystal City, Arlington, VA

#### ▶ September, 13-14, 2006

AAPS Workshop Challenges in Developing Fixed-dose Combination Oral Solid Dose Products  
Hyatt Crystal City, Arlington, VA

#### ▶ October 27-29, 2006

2<sup>nd</sup> Joint AAPS/AAVPT/CRS Workshop on Collaboration in Research and Development of Veterinary Pharmaceuticals  
Co-sponsored with AAVPT, CRS and USP  
Henry B. Gonzalez Convention Center, San Antonio, TX

#### ▶ October 28, 2006

AAPS Workshop on Application of Ion Chromatography in Pharmaceutical Drug Analysis  
Co-sponsored with ALA  
Henry B. Gonzalez Convention Center, San Antonio, TX

#### ▶ October 29–November 2, 2006

2006 AAPS Annual Meeting and Exposition  
Henry B. Gonzalez Convention Center, San Antonio, TX
