Organizing an AAPS Webinar

AAPS webinars provide members with an additional venue for their publishing interests, and, as an end result, they offer an interactive and diverse selection of continuing education events. All without the need for travel, lodging, and time away from home and office. These live events then become archived and available for viewing 24/7.

The process begins with the completion and submission of the webinar proposal form. After review and approval by the AAPS Electronic Program Development Committee (EPDC), the presenter, and moderator will coordinate with the webinar producer/administrator and agree on a date and time for the event. AAPS will provide all instructions and guidance on a timely basis. AAPS webinars are typically 90 min in length, with 45 min devoted to the formal lecture (synchronized with PowerPoint slides) followed by 45 min of Q&A.

To learn more or discuss your upcoming event, please contact Meredith Weston, eLearning Program Manager, at +1.703.248.4775 or email WestonM@aaps.org.

Webinars are free and exclusive to AAPS members. Join or renew with AAPS today!

Calling all candidates

You don't want to miss our 2014 AAPS Annual Meeting and Exhibition Career Fair!

November 2–6, 2014
San Diego Convention Center
San Diego

This year our AAPS Annual Career Fair will be providing résumé reviews, interviewing advice, and a variety of other additional professional development sessions in conjunction with

our 2014 AAPS Annual Meeting and Exhibition. This year we will provide additional professional development mini sessions and company presentations from hiring managers within the career center exhibit hall. Most importantly, we will have our AAPS Annual Career Fair with onsite hiring representatives from many pharmaceutical companies sharing information about their organizations, available career opportunities, and conduct onsite interviews with highly qualified candidates. Take advantage of our preconference alert system, APSCareers LIVE, which will give you the opportunity to flag your résumé prior to attending the career fair and allow participating employers to review your résumé and set up interviews.

AAPS Regulatory Affairs 101

Essentials of Regulatory Affairs for Pharmaceutical Scientist eLearning Series

“The AAPS eCourse Essentials of Regulatory Affairs for Pharmaceutical Scientists eCourse was created as an introduction to regulatory science and the intricacies of the field including regulatory process for market approval, compliance, and regulatory intelligence. In order to meet the latest demands of expanding into emerging markets, the course also has two lectures covering market approval around the globe.”
—Shelley Durazo, Ph.D. Candidate

Overview

The objective of this course is to provide an overview, as well as cross-functional training in regulatory sciences, to better

understand current regulatory processes from discovery to commercialization of pharmaceutical products. Designed with pharmaceutical scientists in mind, this series offers information on:

- The purpose and governance of domestic and international regulatory agencies
- U.S. regulatory processes from early through late stage development
- Domestic and international regulations that govern development, manufacturing, and distribution of pharmaceutical and biopharmaceutical products
- Key tools, including regulatory intelligence, to navigate through the complex regulatory environment and stay current on regulations.

Innovations in Medicine and Translation to the Patient—The Future is Now

Plenary Session at the 2014 AAPS Annual Meeting and Exposition

November 3, 2014

San Diego Convention Center
San Diego

Continuing the theme of examining medical innovations and their impact on patients, AAPS announced the speakers scheduled for the Plenary Session, Monday, November 3, at the 2014 Annual Meeting in San Diego.

Joseph Polli, Ph.D., chair-elect of the 2014 AAPS Annual Meeting and Exposition, previously explained the objectives of the general sessions, “We are on the verge of another revolution in medicine: electronic records, apps for patient diagnosis, and printing organs for transplantation. These exciting innovations will help reduce disease and improve patients’ lives.” The Plenary Session brings two pioneering physicians who have revolutionary vision, and who have developed new clinical therapies in conjunction with technology to decrease the time a patient waits for required treatments, such as organ transplantation. The session will conclude with the personal story of patients relating the impact to their lives of these revolutionary advances.

The Plenary session will open with Anthony Atala, M.D., the Director of the Wake Forest Institute for Regenerative Medicine, and the W.H. Boyce Professor and Chair of the Department of Urology at Wake Forest University. Following Dr. Atala, E. Steve Woodle, MD, FACS will focus on the state of organ transplants and novel methods to allow more patients access to treatments, which have been historically limited for most patients. Dr. Woodle is the William A. Altemeier Chair in Surgery, Professor of Surgery; Director, Division of Transplantation; and Director, Israel Penn International Transplant Tumor Registry, Department of Surgery at University of Cincinnati College of Medicine. Maria and John Polli will close the plenary session by relating their personal experience with a large kidney transplant daisy chain.

“I Am AAPS”—explore the diverse careers held by AAPS members

Various members of the American Association of Pharmaceutical Scientists (AAPS) gathered during the 2013 AAPS Annual Meeting and Exposition to discuss why they chose a career in pharmaceutical sciences and how AAPS has helped foster their journey. The “I Am AAPS” video series displays the diversity of AAPS membership while exhibiting one common goal: to impact global health.
