AAPS 41st Annual Pharmaceutical Technologies Arden Conference—Oral Controlled Release Development and Technology

January 22–27, 2006
 The Thayer Hotel
 West Point, NY

This program is designed to update pharmaceutical scientists on the latest technologies in developing controlled release products. There will be a brief overview of controlled and sustained release development. Detailed presentations will discuss modeling for the design of controlled release products, regulatory and legal aspects of controlled release, material selection including a discussion of the availability of new polymer materials, and an in-depth discussion of the latest technologies to develop and manufacture controlled release products. Each topic will include lectures from experts in the field followed by discussion groups in which participants are encouraged to participate, and where the participants' cases and problems can be addressed. Online registration opens Oct. 17, 2005.
