AAPS MemberNet

The ability to “network” professionally is one of the primary benefits of AAPS Membership. In order to enhance AAPS Members’ ability to network, AAPS is pleased to

offer the AAPS MemberNet, a virtual networking environment that in many ways replicates the face-to-face networking at meetings while providing a rich set of online tools that are available around the clock!

Join the community of scientists by completing your profile and searching for colleagues with similar interests and experiences. Take a moment to see how AAPS MemberNet can keep you connected.

2007 AAPS National Biotechnology Conference

Co-sponsored by FDA and SBE

June 24–27, 2007
 San Diego Convention Center
 San Diego, CA

The week begins with a repeat of the very popular two-day AAPS Training Course: Development and Validation of Quantitative Ligand Binding Assays. Also, three separate Open Forums will be conducted. The week proceeds through the full 2007 AAPS National Biotechnology Conference programming, then, concludes with three short courses; an additional short course will also be held before the conference begins.

The 2007 programming consists of a Plenary Session, Symposia, Roundtables, Posters, and Hot Topics. This conference will also feature a fully operational, and complimentary, Career Center, which will include job postings, a résumé database, and interview facilities. Additionally, a full Exposition Hall will be hosting major companies.

The 2007 AAPS National Biotechnology Conference is designed to provide a complete educational event allowing each and every attendee the ability to customize their experience with the goal of advancing health through innovations in biotherapeutics.

AAPS Ligand Binding Assay Training Course: Development and Validation of Ligand Binding Assays to Support Pharmacokinetic Assessments of Biopharmaceuticals

June 23–24, 2007
San Diego Convention Center
San Diego, CA

Goals and Objectives:

Even though this training course will include LBA theory, it will emphasize practical aspects of LBAs to enable attendees to apply learning immediately following course completion. We will provide an intensive learning experience for the basic principles and regulatory (GLP) considerations of LBAs to support the bioanalysis of biopharmaceuticals.

- ▶ The course spans all LBA stages from method conception, through design/optimization, validation, and implementation with test samples (preclinical through clinical) and statistical considerations.
- ▶ We will cover important aspects of LBAs for quantitative determination of therapeutic proteins and monoclonal antibodies in biological matrices.
- ▶ This course is intended for current pharma/biotech BS/MS lab scientists who perform or have an interest in developing/performing LBAs, recent graduates/new hires who wish to perform LBAs, non-lab scientists and professionals who want in-depth LBA training, pharmacokineticists who utilize LBA data, and regulatory professionals in the biotech field.
