AAPS — YOUR FORMULA FOR SUCCESS!

June 2008

2008 AAPS National Biotechnology Conference

June 22-25, 2008
Metro Toronto Convention Centre
Toronto, Canada
Co-sponsored with BIOTECCanada

AAPS is pleased to announce that the 2008 AAPS National Biotechnology Conference will take place June 22-25, 2008, at the Metro Toronto Convention Centre in Toronto, Canada. Attendees can enjoy a week of pharmaceutical biotechnology programming at the 2008 AAPS National Biotechnology Conference.

Participants can join in three days of conference programming consisting of a Plenary Session, Symposia, Roundtables, and Sunrise Sessions. Some of the sessions that encompass the full program include Plant-based Biologics, Storage and Shipment of Biologics, Quality by Design, Inhibitors, Immunogenicity and Gene Therapy. The conference concludes by offering attendees the opportunity to attend one of four AAPS sponsored short courses, all of which are certain to engage your interest.

This conference will also feature a fully operational Career Center, including job postings, a résumé database, and interview facilities. Additionally, a full Exposition Hall will be hosting major companies.

If you have any questions about the program or registration procedures, please contact the AAPS office, (703) 243-2800, or, send an email to meetings@aaps.org.

The 2008 AAPS National Biotechnology Conference is designed to provide a complete educational event allowing each and every attendee the ability to customize their experience. Biotechnology is the cutting edge and AAPS is there with you.

The online preliminary program now available at:

Biomarker Assay Development and Validation: Challenges and Creative Solutions Associated with Emerging Biomarker Assays

November 15-16, 2008
Georgia World Congress Center, Atlanta GA

The goal of this workshop/training course is to initiate discussions on the current concepts for the qualification and validation of biomarker assays and the application of these concepts to non-conventional (non-ELISA based) biomarker assays. This workshop/training course will include two sessions: the first session will take the form of a biomarker assay development and validation tutorial, providing in-depth training on the fit-for-purpose method development and validation approach advocated in the 2006 White Paper (Lee, et al.). Specific topics will include biomarker nomenclature, an overview of various biomarker methods types, a comparison of biomarker, PK and clinical diagnostic assays, and an overview of general approaches as well as specific case studies to illustrate best practices for biomarker assay development. In addition, common issues encountered in biomarker assays such as selection of the reference standard curve and appropriate QC materials, fit-for-purpose assay acceptance criteria, and the pros and cons of utilizing commercial assay kits will also be discussed. The second session will focus on development and validation challenges and creative solutions associated with less-conventional biomarker assay platforms such as qRT-PCR, Flow Cytometry, ELISPOT, Cell Search, and various multiplex platforms such as Luminex, Meso Scale. Discovery (MSD), and LC/MS. Both sessions will rely heavily on real life case study examples to illustrate the concepts of fit-for-purpose biomarker method development and validation, and successful implementation of biomarker efforts in drug development.

AAPS Section News — Implementation has begun!

AAPS Members will need to examine and make decisions around how to affiliate with the available AAPS Sections. AAPS Members can now fully affiliate with up to two AAPS Sections of their main interest and do not have to make the choice of which should be their primary and secondary sections. AAPS Members wishing to affiliate with more than two AAPS Sections will be charged \$5.00 for each additional affiliated AAPS Section.

Continued

AAPS now has nine Sections available for AAPS Members:

► Analysis and Pharmaceutical Quality Section—provides a forum for the exchange of information pertaining to analytical techniques, regulatory and compendial issues, and assurance of quality.

► Biotechnology Section—enables individuals from multiple scientific disciplines to address issues, share information and experimental findings, and provide education for research, development, and commercialization of new biopharmaceuticals.

► Clinical Pharmacology and Translational Research Section—provides the clinical research dimension within the comprehensive range of pharmaceutical sciences and is concerned with issues related to the clinical use of pharmaceuticals.

► Drug Design and Discovery Section—encourages the generation of knowledge concerning the chemistry, biochemistry, and pharmacological actions of synthetic and naturally occurring medicinal agents.

► *NEW*—Formulation Design & Development Section — unites multiple scientific disciplines in order to share experimental results, consider new formulation and dosage form technologies, and discuss issues and concerns regarding the design and development of formulations/drug products for small molecules.

► *NEW*—Manufacturing Science & Engineering Section—composed of scientists and engineers interested and involved in the application and advancement of science and technology to the manufacture of pharmaceutical and pharmaceutically related products.

► Pharmacokinetics, Pharmacodynamics, and Drug Metabolism Section—provides a forum to examine issues related to the biopharmaceutics, pharmacokinetics, pharmacodynamics, drug metabolism and transport of pharmaceutical products and therapies.

► *NEW*—Physical Pharmacy & Biopharmaceutics Section—focuses on a quantitative understanding of the intrinsic properties of the small drug molecule and the interacting biological system, enabling the selection of developable drug candidates and the identification of potential strategies for optimal drug delivery.

► Regulatory Sciences Section—analyses information on product performance, addresses issues regarding drug law and resultant regulations, and promotes science-based regulations to help drug regulatory agencies protect public health and safety.

AAPS Update

2008 AAPS Annual Meeting and Exposition

November 16-20, 2008

Georgia World Congress Center, Atlanta GA

AAPS expects nearly 9,500 attendees representing dozens of countries at the 2008 AAPS Annual Meeting and Exposition. This is a prime opportunity for you to showcase your research; network with your colleagues doing similar work; and contact possible employers and clients.

As you know, the AAPS Annual Meeting and Exposition is the premier educational event in the pharmaceutical sciences that represents multiple disciplines from the global community. AAPS offers you the diverse programming you demand, while maintaining the high quality and depth you have come to expect. Block out your calendars now for November 16–20, 2008 so you don't miss a single day of the AAPS Annual Meeting and Exposition.

We look forward to your participation in the 2008 AAPS Annual Meeting and Exposition. The preliminary program with the registration information for this meeting is available at www.aapspharmaceutica.com/annualmeeting.

See you in Atlanta!

Upcoming AAPS Meetings

Log onto www.aapspharmaceutica.com/meetings for details.

► June 22-25, 2008

2008 AAPS National Biotechnology Conference
Co-sponsored with BIOTEC Canada
Metro Toronto Convention Centre, Toronto, Canada

► November 15-16, 2008

2008 AAPS Workshop on Biomarker Assay Development and Validation: Challenges and Creative Solutions
Associated with Emerging Biomarker Assays
Georgia World Congress Center, Atlanta, GA

► November 16-20, 2008

2008 AAPS Annual Meeting and Exposition
Georgia World Congress Center, Atlanta, GA
