

Editor's Note: *Pharmacological Reviews* to Publish Online before Print

As the pace of scientific discovery continues to increase, the need for timely review articles becomes even more pressing. Because *Pharmacological Reviews* is a quarterly journal, accepted articles may need to "wait" for several months before they can be included in the next issue of the journal. Starting in January of 2001, *Pharmacological Reviews* articles will be published electronically at <http://pharmrev.aspetjournals.org> as soon as they are in final form, rather than waiting for the

release of the print edition. The article will be in a format identical to the current online articles, and the pdf version of the article will be identical to that which will appear in the print edition. The date of online release will be posted on the web site and will be the official date of publication. Papers may be published online several months before they appear in the quarterly printed issue. We hope that this innovation will be of significant benefit to our authors and readers.
