

ANNOUNCEMENT

The 2nd International Congress of CIANS (Collegium Internationale Activitatis Nervosae Superioris),
Section of the World Psychiatric Association

Prague, June 30 – July 3, 1975

The Congress will serve as a platform for the interdisciplinary discussion of problems related to the experimental and clinical study of higher nervous functions with the following preliminary programme:

1. Genetic and developmental determinants of behaviour
2. Perception and attention
3. Conditioning, learning and memory
4. Speech, thinking and problem solving
5. Sleep and hypnosis
6. Ethological aspects
7. Environmental factors
8. Psychosomatic and corticovisceral relations
9. Neurophysiological mechanisms in psychopathology
10. Prophylactic psychiatry and hygiene
11. Data processing and modelling

Papers on neurohumoral and psychopharmacologic aspects as well as papers on behavioral therapy, autogenic training and deconditioning techniques are welcome.

Congress languages: English, French, German and Russian. Simultaneous translation only in plenary sessions. A social programme, including a special ladies' programme, will be prepared for participants. Many opportunities will be offered to foreign visitors to spend their holiday in Czechoslovakia before or after the Congress.

A preliminary application for participation should be sent to:
