

ANNOUNCEMENT

INTERNATIONAL NARCOTIC RESEARCH CONFERENCE

Leeuwenhorst Congress Center, Noordwijkerhout, The Netherlands, July 23–27, 1978

Characteristics and Function of Opioids

All investigators in the field of opioids are invited to participate in the above meeting. It is planned to hold the following scientific sessions:

- Neurotransmitter role of endorphins.
- Biosynthesis, release and metabolism of endorphins.
- Functional role of endorphins.
- Chemical and structural aspects of opioids.
- Mechanism of opioid tolerance and dependence.
- Opioid receptors.
- Behavioral aspects of opioids.
- Neurochemical and endocrine effects of opioids.

Those wishing to present a communication (oral or poster) are requested to submit the title and an abstract before March 15, 1978. The Program Committee (Chairman: Lars Terenius, Sweden) will accept abstracts which are most appropriate for the meeting. For further information and details concerning the abstract please contact:
