

ANNOUNCEMENT

International Congress In Physical Education

Theme—The Skillfulness In Movement: Theory and Application

June 26 to 30, 1979

Host:

University of Quebec at Trois-Rivières, Trois-Rivières, Quebec, Canada

Disciplines, Subdisciplines, and Fields of Study

Neurophysiology
Psychology
Motor Learning
Biomechanics
Pedagogy-didactics
Sport Psychology
Ergonomy
Human Factors

Theoretical Section

Seven major conferences

Several communication sessions and symposiums dealing with the following sub-themes:

apraxia, central control of movement, peripheral control of movement
attention and movement control, motor memory, central planning of movement, retention and transfer
methodology and instrumentation, theoretical models
mechanical analysis of movement, muscular analysis of movement
motor development
motor behavior and social facilitation, motor behavior and motivation, motor behavior and organization, motor behavior and personality, modifications of motor behavior.

Applied Section

Nine workshops (introductory conference for each workshop)

Sub-themes related to workshops:

classification of motor behavior
adapted motor education
basic motor education
evaluation of motor skill
motor skill and task analysis
motor skill and high-level performance
motor skill and teaching
motor skill and aging
the process of acquiring motor skill
