

Announcing a New Publication

NEUROBEHAVIORAL TOXICOLOGY

AIMS AND SCOPE

Neurobehavioral Toxicology will publish original reports of systematic studies in the areas of neural toxicology and teratology in which the primary emphasis and theoretical context are on the nervous system and behavior, and brief communications which describe a new method, technique or apparatus and results of experiments which can be reported briefly with limited figures and tables

Behavioral studies as such will not be published unless they are obviously pertinent and make a significant contribution to neurotoxicology or teratology. A limited number of relevant reviews and theoretical articles, results of symposia, and more comprehensive studies as monograph supplements will also be published. Articles will be published in English.

VOLUME 1 NUMBER 1
