

SUBJECT INDEX

- Acetaldehyde**
 aversion to alcohol, 269, 291
 blood levels after ethanol ingestion, 101
 blood levels and ethanol elimination, 119
 disulfiram implantation, 73
 genetic markers of alcoholism, 9
 liver injury and protein metabolism, 17
 protein secretion, 31
 protein synthesis, 31
- Acute alcohol intoxication**
 glutathione levels, 53
- Adoption studies**
 hereditary aspects of alcoholism, 9
- ADP translocation**
 ethanol and liver mitochondria, 63
- Alanine aminotransferase**
 regenerating liver and ethanol, 83
- Alcohol consumption**
 decrease during pregnancy and lactation, 149
- Alcohol preference**
 decrease during pregnancy and lactation, 149
- Alcohol tolerance**
 change in EEG, 233
- Alcoholism detection**
 biological markers, 1
- Aldehyde dehydrogenase**
 peroxisomes in normal liver, 111
- ATP synthesis**
 ethanol and liver mitochondria, 63
- Atropine**
 barbital tolerance, 249
- Auditory brainstem**
 response in alcoholics, 241
- Aversion to alcohol**
 acetaldehyde and ethanol preference, 291
 underlying factors, 269
- Bacteria**
E. coli and ethanol tolerance, 191
- Barbital**
 atropine effect on tolerance, 249
- Biological markers**
 alcoholism detection, 1
 blood acetaldehyde after ethanol ingestion, 101
 gamma glutamyltranspeptidase and alcoholism, 95
 glutamate dehydrogenase and liver injury, 107
 hereditary aspects of alcoholism, 9
- Chronic alcohol intoxication**
 glutathione levels, 53
- Chronic alcoholism**
 auditory brainstem response, 241
- Convulsion**
 alcohol withdrawal seizures, 225
- Coronary arteries**
 effects of alcohol, 37
- Corpuscular volume**
 alcoholism detection, 1
- Cyclic AMP**
 protein I and protein phosphorylation, 169
- Cyclo (Leu-Gly)**
 ethanol tolerance, 279
- Disulfiram**
 alcohol and glutathione levels, 53
 implantation and biochemical effects, 73
- Dopaminergic system**
 modulation of ethanol by opioid system, 303
- Drug**
 atropine, 249
 barbital, 249
 disulfiram, 31, 53, 73
 heroin, 245
 morphine, 257, 265
 naloxone, 269, 303
 tetrahydropapaveroline, 269
- Drugs of abuse**
 action on brain reward systems, 213
 intracranial self stimulation and reward, 245
- EEG**
 changes during chronic alcohol exposure, 233
- Electrophysiology**
 ethanol and nervous tissue, 203
- Endorphins**
 modulation by ethanol and morphine, 265
 modulation of ethanol effect on dopaminergic function, 303
- Epinephrine**
 role in ethanol metabolism, 67
- Escherichia coli***
 alcohol tolerance, 191
- Ethanol**
 modulation of endorphin activity, 265
- Ethanol elimination**
 blood acetaldehyde levels, 119
- Ethanol metabolism**
 hormonal role, 67
- Ethanol preference**
 association with actions of alcohol, 297
- Ethanol tolerance**
 neurohypophyseal peptide involvement, 257, 279, 285
- Family history**
 hereditary aspects of alcoholism, 9
- Gamma glutamyltranspeptidase**
 marker of alcoholism, 95
- Genetic markers**
 hereditary aspects of alcoholism, 9, 89
 alcoholic liver disease, 89
- Glucagon**
 role in ethanol metabolism, 67
- Glutamate dehydrogenase**
 blood level as biological marker of alcoholic liver injury, 107
- Glutamate receptors**
 ethanol and membrane function, 197
- Glutathione**
 levels in intoxication, 53
- Gonadal atrophy**
 alcohol and sexual function, 125
- Gonadal function**
 hormonal changes during intoxication and withdrawal, 131
- Heart**
 cardiovascular effects of alcohol, 37
- Heroin**
 intracranial selfstimulation and reward, 245
- Hormonal changes**
 alcohol intoxication and withdrawal, 131
 ethanol infusion in normal subjects, 145
 naloxone and ethanol effects, 145

- Hormone
 - cyclo (leu-gly), 279
 - epinephrine, 67
 - oxytocin, 257, 285
 - vasopressin, 257, 279, 285
- Hypogonadism
 - alcohol and sexual function, 125
- Intracellular recording
 - ethanol and electrophysiology, 203
- Intralobular oxygen gradient
 - liver and ethanol, 41
- Isoelectric focusing
 - serum transferrin assay, 47
- Kindling
 - alcohol withdrawal seizures, 225
- Lipid-protein interactions
 - membrane structure, 155
- Liposomes
 - synaptic glutamate receptors and ethanol, 197
- Liver
 - alcohol and intralobular oxygen gradient, 41
 - ethanol and tryptophan oxygenase and tyrosine aminotransferase, 139
 - gamma glutamyltranspeptidase and alcoholism, 95
 - mitochondria ATP synthesis and ethanol, 63
 - peroxisomes and aldehyde dehydrogenase, 111
 - regeneration and ethanol metabolism, 83
- Liver disease
 - hereditary aspects of alcoholism, 89
- Liver injury
 - protein metabolism, 17
- Membrane properties
 - ethanol and synaptic glutamate receptors, 197
 - lipid-protein interactions, 155
 - phospholipid methylation and signal transmission, 167
- Morphine
 - modulation of endorphin activity, 265
- Morphine tolerance
 - neurohypophyseal peptide involvement, 257
- Na⁺+K⁺-ATPase
 - catecholamine-ethanol interactions, 183
- Naloxone
 - aversion to alcohol, 269
 - ethanol and dopaminergic system, 303
 - ethanol and hormonal effects in normal subjects, 145
- Neurohypophyseal peptides
 - ethanol tolerance, 257, 279, 285
- Neuronal metabolism
 - ethanol effects, 175
- Opiates
 - action on brain reward systems, 213
- Ornithine decarboxylase
 - regenerating liver and ethanol, 83
- Oxytocin
 - involvement in tolerance to drugs, 257, 285
- Phospholipid methylation
 - signal transmission through membranes, 167
- Pregnancy
 - decrease in ethanol consumption, 149
- Protein degradation
 - ethanol and regenerating liver, 83
- Protein I
 - protein phosphorylation, 169
- Protein metabolism
 - liver injury, 17
- Protein phosphorylation
 - protein I, 169
- Protein secretion
 - acetaldehyde and ethanol, 31
- Protein synthesis
 - acetaldehyde and ethanol, 31
- Reward systems
 - action of drugs of abuse, 213
- Self stimulation
 - reward and drugs of abuse, 245
- Serum aspartate transaminase
 - alcoholism detection, 1
- Serum gamma-glutamyl-transpeptidase
 - alcoholism detection, 1
- Sexual function
 - ethanol and gonadal atrophy, 125
- Sialic acid
 - serum transferrin in alcoholism, 47
- Stimulants
 - action on brain reward systems, 213
- Taste factors
 - aversion to alcohol, 269
- Tetrahydroisoquinolines
 - aversion to alcohol, 269
- Tolerance
 - relation to ethanol preference, 297
- Transferrin
 - serum level in alcoholism, 47
- Tryptophan oxygenase
 - ethanol and liver function, 139
- Twin studies
 - hereditary aspects of alcoholism, 9
- Tyrosine aminotransferase
 - ethanol and liver function, 139
 - regenerating liver and ethanol, 83
- Vasopressin
 - involvement in tolerance to drugs, 257, 285
- Withdrawal
 - alcohol and seizures, 225
 - hormonal change in alcoholism, 131
