

ANNOUNCEMENT

A symposium on the Role of Salt in Cardiovascular Hypertension will be held at the Monell Chemical Senses Center of the University of Pennsylvania, on March 25–27, 1981. The objective of the symposium is to bring together a small group of investigators who have contributed consistently to areas related to the role of sodium in health and disease in man and laboratory animals. An additional objective is to highlight important problems and critical directions for further study and development in this area. Those interested in participating in this symposium should contact:
