## NEW PSYCHOPHARMACOLOGY AWARD PROGRAM

The Psychopharmacology Division (28) of the American Psychological Association (APA) is pleased to announce the initiation of a new award program to identify and recognize outstanding research by promising young psychopharmacologists.

*The Young Psychopharmacologist Award*, sponsored by the Burroughs Wellcome Fund, will be presented annually during the APA meeting and will consist of a cash award of \$500, an engraved plaque and travel funds to attend and address the APA meeting. The purpose of the award is to honor each year a young scientist doing original, meritorious work in psychopharmacology and to encourage excellence in research at the interface between the disciplines of pharmacology and psychology.

Individuals eligible for consideration must be nominated by a member or fellow of the Division of Psychopharmacology, and the nomination must be based on work in the area of psychopharmacology/behavioral pharmacology. Persons who are predoctoral trainees or who are no more than five years past the date of receipt of the doctoral degree are eligible for consideration. Each nomination must include three copies of: (1) the nominee's resume or curriculum vitae; (2) the manuscript(s) describing the research on which the nomination is based; and (3) a statement from the sponsor in support of the nomination.

Forward all materials to

Dr. James H. Woods  
President, Department of Pharmacology  
M6322 Medical Science Building I  
University of Michigan Medical School  
Ann Arbor, Michigan 48109.

Deadline for nominations is January 20, 1984. A committee consisting of the President, President-Elect and Past-President of the Division of Psychopharmacology will evaluate the nominees and select an awardee.

# Announcing a New Publication

## Alcohol

### An International Biomedical Journal

Under the general editorship of Dr. Robert D. Myers

Manuscripts now being accepted for review

#### AIMS AND SCOPE

*Alcohol* will publish original reports in English of new and systematic studies in the various fields of alcohol research. All aspects of alcohol's biological action will be covered including anatomy, biochemistry, cell biology, physiology, pharmacology, toxicology, behavior, social anthropology and clinical problems. Brief communications will be included which describe a new method, technique or apparatus or which present results of experiments that can be reported briefly with a minimal number of figures and tables. A limited number of pertinent literature reviews and theoretical articles, results of symposia, reports of meetings and more comprehensive studies will also be published as monograph supplements.

Manuscripts should be submitted to: Dr. Robert D. Myers  
Center for Alcohol Studies and  
Departments of Psychiatry and Pharmacology  
University of North Carolina School of Medicine  
Chapel Hill, North Carolina 27514

Subscription rates: Individual—\$50 per year  
Multi-user institutional—\$150 per year
