

MEETING REPORT

Symposium on Neurobiology of Pain and Drug Abuse

Guelph, Ontario
June 19, 1986

These manuscripts represent the proceedings of a symposium held at the Canadian Federation of Biological Societies Annual Meeting in Guelph. The symposium focussed on various aspects of the Neurobiology of Pain and Drug Abuse and was sponsored in part by the Pharmacological Society of Canada and the Ciba Geigy Corporation. The principal theme of the symposium revolved around a discussion of concepts, data and mechanisms which the speakers believed would significantly enhance additional understanding of pain and drug abuse.
