

Editorial

THE Editor and Publisher of *PHARMACOLOGY BIOCHEMISTRY AND BEHAVIOR* are pleased to announce that beginning with the first issue in 1987, publication of the Journal will be changed to three volumes of four issues each per year because of an increase in number of pages per issue. Due to the high quality of the articles, the Journal's established reputation, and increased manuscript flow, this increase in number of pages will benefit the scientific community by a decrease in publication lag.

PHARMACOLOGY BIOCHEMISTRY AND BEHAVIOR will also immediately begin to publish Rapid Communications. Manuscripts must be original and of high quality. The review process will be accelerated by utilizing additional Advisory Editors. Manuscripts will be accepted with minor revision or they will be rejected. Revised manuscripts will be scheduled for publication in the issue currently in production at the time the corrected proof is received. Rejected manuscripts can be revised and resubmitted for more extensive review according to standard procedures. Rapid Communications must not exceed four printed pages in length, including illustrations, tables and references. In addition, manuscripts must adhere to other requirements as stated in our Instructions to Authors. Authors should indicate that the article is being submitted as a Rapid Communication.

Please submit all manuscripts including Rapid Communications to:

Matthew J. Wayner
