

Editorial Note

In a continuing effort to make optimal use of the available journal space, *Pharmacology Biochemistry & Behavior* will be streamlining its presentation of indexing information. Effective with Volume 28, Number 1, the Journal will discontinue the monthly author index, presenting this information in a cumulative format in the final issue of each volume. In addition, the volume index will no longer contain a repeated presentation of the monthly tables of contents. These measures will make a significant increase in the number of pages available for the presentation of research material.
