

## VOLUME 65, 2000 KEYWORD INDEX

- Accumbens, 369  
Accumbens core, 203  
Accumbens shell, 203  
ACEA-1021, 611  
Acetylcholine, 369, 519  
Acetylcholine release, 375  
Acoustic startle, 691  
Acquisition, 697  
Acute administration, 339  
Adenosine, 155  
Adrenergic agents, 275  
Adrenergic receptors, 255  
Aging, 321, 665  
Allocentric place discrimination task, 131  
 $\alpha 5$  subunits, 743  
AMPA, 67  
Amphetamines, 203, 407, 419, 585, 655  
d-Amphetamines, 43  
Amygdala, 35, 591  
Analgesia, 61, 97, 563, 621  
Animal models, 539  
Anorexia, 531  
Antagonists, 313  
Antibody, 191  
Antidepressants, 1, 339, 591, 737  
Antinociception, 61, 97, 261  
Antisera to opioid peptides, 217  
Anxiety, 7, 199, 351, 539, 571  
Anxiety-like behavior, 267  
Anxiety peptide, 123  
Anxiogenic compound, 7  
Anxiogenic-induced behavior, 649  
Anxiolytic, 465  
Anxiolytic effect, 627  
Anxiolytic-like activity, 339  
Apomorphine, 275, 389, 449  
Appetite, 369, 381  
*Areca catechu*, 1  
Arousal, 495  
2-Aryl-2,5-dihydropyridazino[4,3-b]-  
indol-3(3H)ones, 475  
Attention, 665  
Audiogenic seizures, 475  
Autoshaping, 509  
Avian, 67  
Avoidance behavior, 539
- BALB/c mice, 35, 419, 465  
Basal ganglia, 439  
Behavior, 123, 175  
Behavioral sensitization, 241  
Benzodiazepine receptor agonists, 105  
Benzodiazepines, 35, 223, 351, 705  
binding site of the GABA<sub>A</sub> receptors, 313  
binding sites, 743  
1,4-Benzodiazepines, 475  
Beta-carbolines, 737  
Bicuculline, 223  
Biological rhythms, 289
- Blood pressure, 191  
Bromocriptine, 503  
Brown fat, 719  
BSL behavior, 621  
Buspirone, 281
- C57 mice, 145  
Caffeine, 655  
Calmidazolium, 621  
 $\beta$ -Carbolines, 475  
Catalepsy, 503  
C57BL/6 mice, 35, 419  
C57BL/6J mice, 301  
 $\beta$ -CCE, 267  
CCK, 459  
CDP, 105  
Celiprolol, 719  
Cell damage, 23  
Central injection, 123  
Central muscarinic system, 131  
Cerebral protection, 23  
Challenge, 389  
Chemical model, 577  
Chicks, 223  
Chloroquine, 333  
Choline, 519  
Choline oxidase, 519  
Cholinergic, 163  
Cholinesterase, 175  
Cholinomimetic-induced tremulous jaw  
movements, 683  
Chronic pain, 141  
Chronopharmacology, 289  
Cingulate cortex, 363  
Circadian rhythms, 155, 495, 585  
*cis*-Flupenthixol, 433  
Classical conditioning, 83  
Clonazepam, 705  
Cocaine, 43, 83, 255, 289, 419, 659  
Cocaine discrimination, 671  
Cocaine-induced toxicity, 677  
Cognitive function, 247  
Conditioned fear, 301  
Conditioned flavor preference, 635  
Conditioned place preference, 281, 327,  
419, 697  
Conditioned suppression, 83  
Conflict behavior, 731  
Convulsions, 333  
Cortex, 711  
Corticosterone, 233, 509  
Cortisol, 123, 539  
CPP, 621  
d-CPPene (SDZ EAA 494), 611  
Crack cocaine, 255  
Craving, 369, 489  
CRH, 123  
*Crotalus durissus terrificus* venom, 7  
*Crotalus durissus terrificus* venom, 7
- Crotoxin, 7  
Cue, 489  
Cynomolgus monkeys, 503
- D<sub>1</sub> receptors, 635  
D<sub>2</sub> receptors, 203, 495, 635  
Dantrolene, 439  
DBA/2 mice, 475  
DBA/2J, 301  
Delayed nonmatching-to-position task, 725  
Depression, 539, 591  
Development, 449  
DHPG PHCCC, 439  
Diazepam, 223, 281, 351, 731  
Dichloromethane fraction, 1  
5,7-Dihydroxytryptamine, 15  
Diphenhydramine, 683  
Discrimination, 31, 489  
Diuresis, 53  
Dizocilpine (MK-801), 611  
L-DOPA, 503  
Dopamine, 433, 439, 509, 635, 659  
Dopamine agonists, 495  
Dopamine antagonists, 671  
Dopamine D<sub>3</sub> receptors, 31, 241  
Dopamine turnover, 389  
Dopaminergic, 163  
Doxepin, 683  
7-OH-DPAT, 31, 241  
8-OH-DPAT, 183  
D<sub>2</sub>-receptors, 547  
Drinking, 375  
Drinking behavior, 719  
Drug abuse, 369, 509, 655  
Drug discrimination, 43  
Drug-induced stimulus control, 75  
Drug interactions, 43
- EAA494 NMDA antagonists, 725  
Eating, 375  
EEG, 577, 711  
EGb 761, 321  
Elevated plus-maze, 15, 209, 267  
Elevated T-maze, 571  
Elevated zero-maze, 737  
Eliprodil, 611  
EMG, 117  
Enadoline, 43  
Environment, 389  
Ephedrine, 655  
Epilepsy, 475, 547  
Ethanol, 281, 345, 357  
Ethanol discrimination, 145  
Ethanol reward, 145  
Ethanol withdrawal, 345  
Ethological analysis, 209  
Eticlopride, 203  
Event-related potentials, 711  
Exploration, 7

- Exploratory, 433  
 Exploratory activity, 737  
 Expression studies, 635, 697  
 Extinction, 399
- Fear conditioning, 691  
 Fear-potentiated startle, 301  
 Feeding, 183, 369, 433  
 Feeding behavior, 381, 719  
 Fenfluramine, 369  
 Fentanyl, 563  
 Flavonoids, 313  
 Flumazenil, 223, 475, 705  
 Fluoxetine, 209  
 Food intake, 67, 97, 381, 531  
 Foot shock, 363  
 Forced-swim test, 591  
 Four-plate test, 339
- GABA, 223, 705  
 GABA-benzodiazepine receptors, 627  
 GABA transporter, 351  
 GABA<sub>A</sub>-receptors, 731, 743  
 Gender, 53, 91  
 Genetics, 301  
 Gepirone, 209  
 Gerbils, 599  
 Gingko biloba, 321  
 Glutamate, 67, 345  
 Glutamate receptors, 627  
 Guinea pig, 175
- H1 antagonists, 683  
 Hamster, 585  
 Harmaline, 117  
 Herbal dietary supplements, 655  
 High-performance liquid chromatography, 289  
 Hippocampus, 15, 547, 711  
 Histamine, 61  
 Holeboard, 7  
 HPA axis, 591  
 5-HT, 1  
 5-HT<sub>3</sub> antagonists, 145  
 5-HT-receptor antagonists, 531  
 5-HT transporter, 233  
 5-HT<sub>1A</sub>, 75, 183  
 5-HT<sub>2A</sub>, 75  
 5-HT<sub>1A</sub> receptors, 233  
 Humans, 599  
 Hydroxyl radicals, 425  
 5-Hydroxytryptamine, 1, 75, 145, 183, 233, 531  
 Hyperalgesia, 141, 261  
 Hypericin, 627  
*Hypericum*, 627  
 Hypokinesia, 523  
 Hypothermia, 23, 389
- Ibotenate, 163  
 Imipramine, 571  
 Immediate-early gene NGFI-A, 399  
 Immunization, 191  
 Improgan, 61  
 Impulsivity, 731  
 Inbred mice, 301, 399  
 Individual differences, 509  
 Intact male mice, 327  
 Interleukin-1, 531  
 Interstimulus interval, 83
- Kainic acid, 39  
 Kappa opioid receptors, 97
- Kappa opioids, 53  
 Kindling, 23, 743
- [<sup>3</sup>H]L-655,708, 743  
 Labetalol, 255  
 Latent inhibition, 459  
 Lateral hypothalamus, 183  
 Learning, 233, 519  
 Lesion, 267  
 Lever press, 509  
 Lewis, 357  
 Licking, 275  
 Lidocaine, 117  
 Light, 585  
 Light-dark aversion test, 649  
 Light/dark choice procedure, 465  
 Lipolysis, 719  
 Lithium, 547  
 Locomotor activity, 191, 241, 281, 389, 433, 495, 539, 585  
 Locomotor behavior, 627
- Macronutrient intake, 381  
 Male and female rats, 671  
 Marking behavior, 539  
 Mazes
  - elevated plus-maze, 15, 209, 267
  - elevated T-maze, 571
  - elevated zero-maze, 737
- MCAO, 553  
 MDL 11939, 677  
 MDL 72222, 145  
 Mechanisms, 577  
 Median raphe nucleus, 15  
 Mediating behavior, 725  
 Memantine, 611  
 Memory, 223, 233, 321, 519  
 Memory processing, 363  
 Meprobamate, 465  
 Mepyramine, 683  
 Mesopontine, 163  
 Metabotropic glutamate receptors, 439  
 Methamphetamine, 705  
 Methiothepin, 677  
 5-Methoxy-*N,N*-dimethyltryptamine, 75  
 3,4-Methylenedioxyamphetamine (MDEA), 223  
 Mianserin, 677  
 Mice, 339, 389, 503, 519  
 Microdialysis, 15, 183, 345, 369, 659  
 Microphysiometry, 719  
 MK-801, 611  
 Moclobemide, 649  
 Monoamine oxidase-A, 1  
 Morphine, 43, 53, 419
  - gender differences, 91
  - reinforcing properties, 91
- Morris maze, 105  
 Motor activity, 439  
 MPTP, 425  
 MSOPPE, 439  
 Muscarinic, 163
- Naloxone, 621  
 Naltrexone, 333, 697  
 Naltrindole, 145  
 NAN 190, 677  
 Neonatal, 563, 711  
 Neuroleptic, 433  
 Neuropathic pain, 141  
 Neuroprotection, 425  
 Neurotoxicity, 233, 449
- Nicotine, 191, 247, 665, 711  
 Nitric oxide, 199  
 7-Nitroindazole, 199  
 Nitrous oxide antinociception, 217  
 NMDA receptors, 39, 67, 439, 659, 743  
*N*-Methyl-D-aspartate, 621  
 Nociception, 621  
 Noradrenaline, 223, 539, 591  
 NREM sleep, 155  
 Nucleus accumbens, 345, 659
- Olfactory learning, 321  
 Open field, 7, 585  
 Operant behavior, 247, 553, 611  
 Opiates, 465, 563
  - gender differences, 91
  - reinforcing properties, 91
- δ-Opioid antagonists, 145  
 Opioid peptides, 217  
 κ-Opioid receptors, 261  
 μ-Opioid receptors, 261  
 Opioids, 333, 489, 697
- P and NP lines of rats, 691  
 Pain, 621  
 Palatability, 97  
 Panic, 571  
 Parkinsonism, 523  
 Parkinson's disease, 425, 503  
 Passive-avoidance learning, 223  
 Pavlovian conditioning, 509  
 PBN, 425  
 PD-135,158, 459  
 Pentylentetrazol (PTZ), 23  
 Pentylentetrazole, 475, 743  
 Peptidase inhibitors, 217  
 Performance, 665  
 Pharmacokinetics, 191, 289, 327  
 Phencyclidine, 449  
 Phentermine, 369  
 PHNO, 495  
 Physical dependence, 563  
 Physostigmine, 175  
 Pigs, 123  
 Pilocarpine, 547  
 Plus-maze test, 199, 465  
 PNU-99194A, 31  
 PPTg, 267  
 Pregnancy, 105  
 Prenatal morphine, 39  
 Prenatal protein malnutrition, 105  
 Prepulse inhibition, 449  
 Pretreatment, 175  
 Protein restriction, 105  
 Protohypericin, 627  
 Pruritus, 333  
 Pseudohypericin, 627
- Quinine, 357
- Raclopride, 635, 671  
 Radical scavenger, 425  
 Rat behavior, 351  
 Rat model of psychosis, 459  
 Rat strain, 141  
 Rat thigmotaxis, 209  
 Rats, 15, 23, 75, 83, 97, 105, 131, 183, 247, 267, 275, 281, 333, 381, 389, 503, 509, 553, 563, 611, 621, 659, 665, 719, 725  
 Rearing, 495  
 Recognition, 321  
 Reinforcement, 433

- Relapse, 489  
REM sleep, 155  
Repeated cold stress, 261  
Reward, 407  
Rewarding properties, 327  
*Ricinus communis*, 577  
Rigidity, 523  
[<sup>3</sup>H]Ro 15-1788, 743  
Ropinirole, 503  
Rotarod, 7, 475  
Rotation, 553
- S*-Adenosyl-L-methionine, 523  
Saccharin, 357  
Salicylate trapping, 425  
SCH-23390, 635, 671  
Schizophrenia, 449  
Scopolamine, 175  
SDZ EAA 494, 611  
Secretogranin II, 399  
Seizures, 39, 577, 677, 743  
Selegiline, 649  
Self-administration, 289, 399, 489, 563  
Self-stimulation, 375, 407  
Sensitization, 495, 659, 705  
Sensorimotor, 449  
Sensory, 433  
Serotonin, 1, 15, 75, 145, 183, 233, 509, 531, 591, 731
- Sex differences, 53, 671  
Sham-feeding preparation, 635  
Shuttle-box avoidance, 23  
Sleep homeostasis, 155  
Sleep-wake cycle, 155  
Social interaction, 7, 267  
Soman, 175  
Spinal cord, 621  
Spiradoline, 97  
Squirrel monkeys, 43  
SSRIs, 339  
Staircase test, 553  
Startle, 449  
Step-through passive-avoidance task, 519  
Stereotypy, 389  
Stimulants, 655  
Stimulus detection, 665  
Strain differences, 743  
Stress, 495, 509, 539, 591  
Striatum, 389, 547  
Subchronic, 175  
Sucrose, 97, 697  
Swiss mice, 465  
Synaptosomes, 1
- Tail flick test, 97, 621  
Taste, 599  
Taurine, 345  
TCDD, 381
- Testosterone, 327, 731  
2,3,7,8-Tetrachlorodibenzo-*p*-dioxin, 381  
TFMPP, 677  
Tiagabine, 351  
Tolerance, 563, 611  
Trait anxiety, 35  
Tremors, 117, 503, 523  
Tricyclic antidepressants, 339, 599  
Turning behavior, 203
- U69, 593  
Urocortin, 123
- Vaccine, 191  
Ventral tegmental area, 375  
Ventromedial tegmentum, 503
- Water maze, 105  
Weak training, 223  
Wet dog shakes, 39  
Wheel running, 585  
Wistar Kyoto, 357  
Withdrawal, 407  
Within-session antagonists, 433  
Working memory, 725
- Zolpidem, 351  
Zucker rat, 719
