### Retraction notice

## Retraction notice to “An acetylcholinesterase-independent mechanism for neurobehavioral impairments after chronic low level exposure to dichlorvos in rats” [Pharmacol Biochem Behav 92 (2009) 173–181]

Suresh Kumar Verma, Vijay Kumar, Kiran Dip Gill

Department of Biochemistry, Postgraduate Institute of Medical Education and Research, Chandigarh, 160012 India

This article has been retracted at the request of Editor-in-Chief George F. Koob, Scripps Research Institute, La Jolla, CA, U.S.A.

*Reason:* This article has been retracted at the request of the Editor as the authors self-plagiarized part of a paper that had already appeared in *Toxicology*, entitled “Role of muscarinic signal transduction and CREB phosphorylation in dichlorvos-induced memory deficits in rats: An acetylcholine independent mechanism”, Volume 256, Issue 3, 27 February 2009, Pages 175–182, doi:10.1016/j.tox.2008.11.017. One of the conditions of submission of a paper for publication is that authors declare explicitly that their work is original and has not appeared in a publication elsewhere. Re-use of any data should be appropriately cited. As such this article represents a severe abuse of the scientific publishing system. The scientific community takes a very strong view on this matter and we apologize to readers of the journal that this was not detected during the submission process.
