

## VOLUME 78, 2004 KEYWORD INDEX

- Absence epilepsy, 369  
 Acepromazine, 111  
 Acetylcholinesterase (AChE), 787  
 AChE Inhibitors, 667  
 Acoustic startle reflex, 229  
 Acupuncture, 793  
 Acute haloperidol, 47  
 Acute olanzapine, 47  
 Acute stress, 569  
 Affect, 473, 523, 531  
 Age differences, 661  
 Aggression, 621  
 Agmatine, 217  
 Alanine, 781  
 Alcohol, 603, 611, 621, 827  
 Alcohol-preferring and -nonpreferring rats, 65  
 Allopregnanolone, 405, 435, 465, 531  
 Alpha-adrenoceptors, 135  
 Amnesia, 309  
 Amphetamine, 263, 691  
 Amygdala-kindled seizures, 103  
 $\alpha$ , $\beta$ -amyrins, 719  
 Analgesia, 217  
 Androgen receptors, 473, 559  
 Androgens, 379, 473, 559  
*Aniba riparia*, 27  
 Animal model, 483, 661  
 Antagonists, 349  
 Antidepressant, 165, 269  
 Antidepressant activity, 319  
 Antidepressant effect, 711  
 Antinociception, 209, 247  
 Anxiety, 445, 465, 621, 629  
 Anxiety disorders, 683  
 Anxiolytic and antidepressant effects, 27  
 Arousal, 765  
 Aspartame, 121  
 ATPase, 121  
 ATPase–ADPase activities, 341  
 Attention, 611, 629, 639  
 Audiogenic seizures, 75  
 Automated, 269  
 AVP<sub>4–9</sub>, 309  
 Baclofen, 743  
 Behavior, 143, 675  
 Behavioral sensitization, 47  
 Behavioral tolerance, 293  
 Benzodiazepine, 57, 185, 445  
 Bicuculline, 83  
 Binge drinking, 611  
 Body temperature, 255  
 Bupropion, 379  
 Butorphanol, 653  
 BZE, 93  
 Caffeine, 765  
 Cannabinoid, 83  
 Cannabinoid agonist-stimulated [<sup>35</sup>S] GTP $\gamma$ S binding, 593  
 Capsaicin, 349  
 Carbamazepine, 103  
 Cardiovascular effects, 93  
 Catalepsy, 727  
 Catuama, 757  
 Caudate, 541  
 C57BL/6, 435  
 Cell death, 505  
 Cerebral ischemia reperfusion (CIR), 319  
 Channel, 349  
 Chick, 707  
 Chlordiazepoxide, 811  
 Choice accuracy, 775  
 Cholecystokinin, 209  
 Cholinergic neurotransmission, 667  
 Cholinergic receptors, 121  
 Chronic, 121  
 Chronic haloperidol, 47  
 Chronic olanzapine, 47  
 Chronic stress, 341  
 Cigarette smoking, 675  
 CINC, 799  
 Clinical trial, 603  
 Clomipramine, 661, 711  
 Clonazepam, 103  
 Clonidine, 135, 247  
 Clozapine, 751, 811  
 CO<sub>2</sub>, 191, 309  
 Cocaine, 93, 199, 263, 301, 699, 821, 827  
 Cocaine dose, 293  
 Cocaine duration, 293  
 Cognition, 735  
 Complete Freund's adjuvant, 793  
 Complex magnetic fields, 217  
 Compound 48/80, 719  
 Conditioned avoidance response, 811  
 Conditioned place preference, 135, 185, 419, 691, 827  
 Conditioned taste avoidance, 1  
 Contextual conditioning, 357  
 Contextual fear conditioning, 111  
 Continuous cocaine, 293  
 Control, 419  
 Corticosteroid hormones, 369  
 Corticosterone, 369, 445, 593  
 Cotinine, 13  
 Craving, 647  
 CRF, 799  
 Cross-sensitization, 691  
 2C-T-7, 821  
 D-amphetamine, 541  
 DBA/2, 435  
 Defensive behavior, 357  
 Defensive prod burying, 445  
 Delayed nonmatching to position task, 735  
 Depression, 165, 531, 757  
 Desensitization, 775  
 Desipramine, 711  
 Dextran T40, 719  
 Diazepam, 57  
 Differential access, 199  
 3 $\alpha$ -diol, 483  
 DOM, 821  
 Dopamine, 143, 263, 781  
 Dopamine autoreceptors, 293  
 Dopamine D1 agonist, 805  
 Dopamine D3 agonist, 805  
 Dopamine D3 antagonist, 805  
 Dopamine receptors, 581  
 Dopamine transporters, 581

- Dose-response, 13  
Drinking, 629  
Drug abuse, 263  
Drug discrimination, 821  
Drug interaction, 103  
Drug metabolism, 285
- Early deprivation, 465  
Eight-arm radial maze, 35  
Electroencephalography, 667  
Electroshock, 75  
Elevated plus-maze, 7  
Elevated plus maze, 445, 459  
EME, 93  
Empathogens, 821  
Endomorphin-1, 171  
Energy expenditure, 275  
Epilepsy, 75  
ER $\alpha$ , 523  
Escalation, 199  
Estradiol, 523  
Estrogen, 513, 551  
Estrogen receptor, 523  
Estrogens, 379  
Estrus, 569  
Ethanol, 427, 445, 743  
Ethanol sedation, 65  
Ethanol withdrawal, 459  
Executive function, 611, 629  
Exercise, 255  
Experimental, 349  
Extinction, 357, 827  
Extrapyramidal system, 727
- Fatigue, 255, 621  
Fear/anxiety, 357  
Fear conditioning, 155  
Felbamate, 103  
Female, 541, 569  
Female mice, 135  
Flavor–flavor learning, 239  
Fluoxetine, 165, 711  
Fluvoxamine, 683  
Food intake, 707  
Footshock stress, 209  
Forced swimming test, 165, 711  
Forced swim test, 7, 269  
Free radicals, 143, 191  
Frontal lobes, 629  
Fructose, 239
- GABA, 83, 301, 559  
GABA<sub>A</sub>, 473, 495  
GABA<sub>A</sub> receptor, 495  
GABAergic receptor, 327  
Garlic, 787
- Gender, 199, 603  
Gender differences, 647  
Genetics, 13  
Genital reflexes, 301  
Gestational stress, 531  
Glutamatergic receptor, 327  
Grooming, 333
- Habituation, 357  
Hallucinogens, 821  
Haloperidol, 751, 811  
Handling-induced convulsions, 435  
Heat storage rate, 255  
Herb, 57  
Herbal product, 757  
Hippocampus, 341, 505, 531, 541, 781  
Histamine 3 receptor, 275  
Hotplate, 217  
HPA Axis, 185  
5-HT<sub>2C</sub> receptor, 683  
Human, 57, 653  
Humans, 93  
3 $\alpha$ -hydroxy-5 $\alpha$ -pregnan-20-one, 465  
Hyperactive sexual desire, 379  
Hypoactive sexual desire disorder, 379  
Hypothermia, 83
- Ibotenic acid lesions, 229  
Immunohistochemistry, 143  
Inflammation, 793  
Interleukin-6, 75  
Intracerebroventricular injection, 707  
Intravenous, 199
- Ketamine, 111  
Ketanserin, 47  
Knockout, 765
- Laterodorsal tegmental nucleus, 229  
Learning, 179, 551, 559  
Lesioned nucleus basalis magnocellularis, 667  
Level changes, 427  
Lipid peroxidation, 191, 327  
Lithium–pilocarpine epilepsy, 111  
Liver, 13  
Lobeline, 1  
Locomotion, 541  
Locomotor activity, 7, 683, 799  
Locomotor behavior, 727  
Lordosis, 405
- Magnesium, 7  
Male rat sexual behavior, 129  
Marmosets, 357  
Mast cell, 719
- Maternal separation, 465  
Mating, 419  
*m*-Chlorophenylpiperazine, 683  
MDMA, 821  
Memory, 121, 179, 309, 611, 621  
Mental flexibility, 621  
Methamphetamine, 1, 185  
1-methyl-4-phenyl-1, 2, 3, 6-tetrahydropyridine, 179  
Mexican plant, 129  
Mice, 7, 13, 143, 333, 781  
Mnemonic, 551  
Modafinil, 735, 765  
Monkey, 805  
Monoamine, 319  
Mood, 57, 639  
Morphine, 135, 171, 217, 247  
Morris water maze, 735, 787  
Mouse, 269, 719, 765  
MPTP, 143, 179  
4-MTA, 821
- Naloxone, 247  
Naltrexone, 743  
NC-1900, 309  
Neonate-6-hydroxydopamine lesion, 47  
Neuroactive amino acids, 75  
Neurodegeneration, 505, 513  
Neurohypophysis, 333  
Neuropathic pain, 171  
Neuropeptide Y, 65  
Neuroprotection, 513  
Neurosteroid, 435  
Neurosteroids, 405, 531  
Neurotransmitter uptake and release, 757  
7-NI, 247  
Nicotinamide, 179  
Nicotine, 13, 165, 581, 639, 775  
Nitrite formation, 327  
NMDA, 781  
NO, 247  
Nociceptin/orphanin FQ, 171  
Nociception, 593  
Noncopulators, 129  
Non-genomic, 405  
Nongenomic, 473, 505, 531, 551, 559  
NSAID, 793  
5'-Nucleotidase activity, 341
- Object recognition, 541  
Obsessive–compulsive disorder, 661  
ODQ, 247  
6-OHDA lesions, 513  
Open field, 593  
Opioid, 209, 653

- Opioid antagonism, 239
- Orchidectomy, 711
- ORL1 receptor, 171
- Ovariectomy, 191
- Oxazepam, 185
- Oxidative stress, 751
- Oxytocin, 333
- Oxytocin receptor, 333
  
- Pain, 349, 653, 793
- Paradoxical sleep deprivation, 301
- Paraphilia, 379
- Parkinsonism, 263
- Parkinson's disease, 513
- Paroxetine, 683
- Pentylentetrazole, 483
- Periadolescent, 13
- Pharmacokinetics, 13
- Phencyclidine, 47
- Phenobarbital, 103
- Phenylephrine, 135
- Phenytoin, 103
- Phospholipase C, 155
- Pilocarpine, 327
- Pineal, 727
- Planning ability, 611
- Plasma levels, 93
- Plus maze, 465
- Polyamine, 35
- Polydrug, 827
- Porsolt, 531
- Porsolt test, 165
- Prazosin, 135
- Predator confrontation, 357
- Pregnancy, 675
- Pregnanolone, 191
- Pregnenolone sulfate, 781
- Prepulse inhibition, 229
- Proestrus, 551, 569
- Progesterone, 505, 699
- Psychomotor, 653
- Psychomotor performance, 57
- Pueraria lobata*, 319
- Putrescine, 35
  
- Quinpirole-induced perseveration, 661
  
- Rat, 1, 171, 217, 301, 427, 593, 683, 811
- Rats, 191, 293, 445, 495, 541, 743
- Reactive oxygen species, 751
- $\mu$  Receptor, 707
- $\delta$  Receptor, 707
- $\kappa$  Receptor, 707
- 5 $\alpha$ -reductase, 435
  
- Reinstatement, 827
- Relapse, 827
- Repeated cycles, 459
- Reserpine, 319
- Respiratory quotient, 275
- Restraint stress, 209
- Riparin III, 27
  
- Saccadic eye velocity, 603
- Saccharin, 13, 239
- Salivation, 647
- Salt appetite, 691
- SCH 50911, 83
- Scopolamine, 787
- Scratching behavior, 719
- Sedative–hypnotic, 57
- Seizure, 209
- Seizure risk, 495
- Seizures, 327, 483, 495, 781
- Selective attention, 639
- Selective serotonin re-uptake inhibitor, 683
- Selective serotonin uptake inhibitor, 165
- Self-administration, 199, 699
- Sensitization, 581
- Serotonin reuptake inhibitors, 711
- Sex, 459, 495
- Sex difference, 569
- Sex differences, 13, 199, 445, 465, 495, 523, 581, 621, 629, 639
- Sexual arousal, 129
- Sexual behavior, 379
- Sexual dimorphism, 513
- Sexual experience, 419
- Sexual incentive, 419
- Sexual motivation, 379, 427
- Sexual performance, 427
- Sexual receptivity, 405
- Sexual stimulant, 129
- SHIRPA, 35
- Skin conductance, 647
- Sleep, 765
- Sleep deprivation, 765
- Sleep latency, 765
- Smoking, 647
- Social interaction test, 459
- Sodium, 349
- Spatial learning, 35
- Spatial memory, 569, 775
- Spermidine, 35
- Spermine, 35
- Spike-wave discharges, 369
- Spontaneous motor activity, 65
- SSAT, 35
  
- SSRI, 379
- Stimulants, 821
- Stress, 341, 465, 495, 541, 799
- Striatum, 143, 727
- Subcellular fractionation, 155
- Subjective, 653
- Subjective effects, 93
- Substance abuse, 675
- Substantia nigra, 143, 513
- Sweet taste, 239
- Synaptophysin, 541
  
- Tail suspension test, 269
- Tardive dyskinesia, 805
- Taste hedonics, 239
- Tele-methylhistamine, 275
- Temporal patterns, 217
- Testosterone propionate, 711
- Thioparamide, 275
- 3 $\alpha$ ,5 $\alpha$ -THP, 465
- T-maze, 121
- T maze, 661
- Tolerance, 93
- Traditional Japanese medicine, 799
- Traditional remedy, 129
- Tryptophan, 255
- Two-bottle, 13
  
- Ultrasonic vocalizations, 465
- Unkei-to, 799
- USV, 465
  
- Valerian, 57
- Valeriana officinalis*, 57
- Vascular dementia, 179
- Vasopressin, 309, 333
- Vigilance, 639
- Voluntary oral consumption, 13
  
- WAG/Rij rats, 369
- Water maze, 111
- Weaning, 593
- WIN 55212-2, 83
- WIN 55,212-2, 593
- Withdrawal, 435
- Withdrawal duration, 293
  
- Xenobiotic response, 285
- Xenosensor function, 285
  
- Yohimbine, 135
  
- Z-ajoene, 787
