CONTENTS

Series A Volume 253

| | |
|--|---------------|
| Stability of flow in a rotating viscous incompressible fluid subjected to differential heating. By J. BRINDLEY | <i>page</i> 1 |
| Hassitt-type Young operator expansions. | |
| I. An orthogonal transformation between (a) the Young operators of the symmetric group S_{A+1} and (b) the two-sided products of the Young operators of S_A with the transposition $P_{A,A+1}$. By H. A. JAHN | 27 |
| Laminar boundary-layer flow near separation with and without suction. By R. M. TERRILL | 55 |
| On a differential equation of boundary-layer theory. By W. A. COPPEL | 101 |
| The Boltzmann equation for a bounded medium. I. General theory. By S. SIMONS | 137 |
| The classical field theory of matter and electricity. | |
| I. An approach from first principles. | 185 |
| II. The electromagnetic theory of particles. By S. R. MILNER, F.R.S. | 205 |
| Quadratic Diophantine equations. By G. L. WATSON | 227 |
| On adsorption at the oil/water interface and the calculation of electrical potentials in the aqueous surface phase. | |
| II. The effects of ionic size. By D. A. HAYDON and F. H. TAYLOR | 255 |
| Ionization fronts in interstellar gas and the expansion of HII regions. By F. A. GOLDSWORTHY | 277 |
| Ionization fronts in interstellar gas: the structure of ionization fronts. By W. I. AXFORD | 301 |
| The structure of the vibrational-rotational bands of an asymmetric rotor. By H. C. ALLEN, Jr. | 335 |
| A neutral line discharge theory of the aurora polaris. By S.-I. AKASOFU and S. CHAPMAN, F.R.S. | 359 |
| The behaviour of two-valued response regulators applicable to adiabatic calorimeters. By A. J. B. CRUICKSHANK | 407 |
| Dynamical theory of electron diffraction for the electron microscopic image of crystal lattices. | |
| I. Images of single crystals. | 459 |
| II. Image of superposed crystals (Moiré pattern). | 490 |
| By H. HASHIMOTO, M. MANNAMI and T. NAIKI | |
| Steady-state thermoelasticity for initially stressed bodies. By A. H. ENGLAND and A. E. GREEN, F.R.S. | 517 |
| Analysis of the naphthalene vapour absorption bands at 3200 Å. | |
| I. Naphthalene <i>h</i> -8. | |
| By D. P. CRAIG, J. M. HOLLAS, M. F. REDIES and S. C. WAIT, JR. (Plates 9 and 10) | 543 |
| II. Naphthalene <i>d</i> -8. | |
| By D. P. CRAIG and J. M. HOLLAS | 569 |
| Index | 582 |
