## INDEX TO VOLUME 271 (B)

*Author index*

- Allison, A. C., *See* Davies, Allison & Cardella.
- Amoroso, E. C. & Perry, J. S. The existence during gestation of an immunological buffer zone at the interface between maternal and foetal tissues, 343.
- Bijkerk, C. Recreation values of forests and parks, 179.
- Boyce, S. G. The use of bole surface in the estimation of woodland production, 139.
- Burger, M. M., Turner, R. S., Kuhns, W. J. & Weinbaum, G. A possible model for cell-cell recognition via surface macromolecules, 379.
- Cardella, C. J. *See* Davies, Allison & Cardella.
- Clegg, J. B. *See* Weatherall & Clegg.
- Crowe, Dame Sylvia. Forests in relation to landscape and amenity, 199.
- Cullen, M. J. The jumping mechanism of *Xenopsylla cheopis*. II. The fine structure of the jumping muscle, 491.
- Davies, P., Allison, A. C. & Cardella, C. J. The relation between connective tissue cells to intercellular substances, including basement membranes, 363.
- Dingle, J. T. The secretion of enzymes into the pericellular environment, 315.
- Fell, Honor Dame. The role of mucopolysaccharides in the protection of cartilage cells against immune reactions, 325.
- Gibson, E. J. The uses of wood: long term prospects, 91.
- Godwin, Sir Harry. History of the natural forests of Britain: establishment, dominance and destruction, 47.
- Holmes, G. D. History of forestry and forest management, 69.
- Johnston, D. R. Tree growth and wood production in Britain, 101.
- Kuhns, W. J. *See* Burger, Turner, Kuhns & Weinbaum.
- Maroudas, Alice. Glycosaminoglycan turnover in articular cartilage, 293.
- Matthews, J. D. Prospects for improvement by site amelioration, breeding, and protection, 115.
- Monge, C. *See* Zeuthen & Monge.
- Muir, Helen. *See* Wiebkin & Muir.
- Neville, C. *See* Rothschild, Schlein, Parker, Neville & Sternberg.
- Palmer, F. Wood supply and demand – the medium term prospects for Britain, 81.
- Parker, K. *See* Rothschild, Schlein, Parker, Neville & Sternberg.
- Perry, J. S. *See* Amoroso & Perry.
- Ross, R. Connective tissue cells, cell proliferation and synthesis of extracellular matrix—a review, 247.
- Rothschild, Miriam, Schlein, J., Parker, K., Neville, C. & Sternberg, S. The jumping mechanism of *Xenopsylla cheopis*. III. Execution of the jump and activity, 499.
- Rothschild, Miriam & Schlein, J. The jumping mechanism of *Xenopsylla cheopis*. I. Exoskeletal structures and musculature, 457.
- Schlein, J. *See* Rothschild & Schlein; *also* Rothschild, Schlein, Parker, Neville & Sternberg.
- Scott, J. E. Physiological function and chemical composition of pericellular proteoglycan (an evolutionary view), 235.
- Silver, I. A. Measurement of pH and ionic composition of pericellular sites, 261.
- Steele, R. C. Forests and wildlife, 163.
- Sternberg, S. *See* Rothschild, Schlein, Parker, Neville & Sternberg.
- Stockwell, R. A. Structural and histochemical aspects of the pericellular environment in cartilage, 243.
- Stone, E. L. Effects of species on nutrient cycles and soil change, 149.
- Turner, R. S. *See* Burger, Turner, Kuhns & Weinbaum.

Verney, R. B. A future forest policy for Britain, 219.

Weatherall, D. J. & Clegg, J. B. The  $\alpha$ -chain-termination mutants and their relationship to the  $\alpha$ -thalassaemias, 411.

Weinbaum, G. *See* Burger, Turner, Kuhns & Weinbaum.

Whittington, H. B. The enigmatic animal *Opabinia regalis*, Middle Cambrian, Burgess Shale, British Columbia, 1.

Wibberley, G. Land use and rural planning, 213.

Wiebkin, O. W. & Muir, Helen. The effect of hyaluronic acid on proteoglycan synthesis and secretion by chondrocytes of adult cartilage, 283.

Wild, A. E. Role of the cell surface in selection during transport of proteins from mother to foetus and newly born, 395.

Wrigglesworth, J. M. Electrostatic interactions at the plasma membrane, 273.

Zeuthen, T. & Monge, C. Intra- and extracellular gradients of electrical potential and ion activities of the epithelial cells of the rabbit ileum *in vivo* recorded by microelectrodes, 277.

*Subject index*

- $\alpha$ -thalassaemia, chain-termination mutants causing, 411.
- Basement membranes, 363.  
 Biological potential, 139.  
 Britain's overseas supply pattern up to 2000 A.D., 81  
 Burgess Shale, Middle Cambrian, 1.
- Cartilage, immune reactions, 325.  
 Cell-cell recognition, 379.  
 Cell proliferation, 247.  
 Chain termination mutant haemoglobins, 411.  
 Chemical physiology of connective tissue, 235.  
 Connective tissue synthesis, 247.
- Enzymes, secretion of, 315.
- Forest policy for Britain, 219.  
 Forests and wildlife, 163.
- Growth of trees in Britain, 101.
- Histochemistry, 243.  
 History of forest management, 69.  
 History of the natural forests of Britain, 47.  
 Hormones and trophoblast rejection, 343.  
 Hyaluronic acid influences upon proteoglycan synthesis by chondrocytes, 283.
- Intracellular ion activities of the rabbit ileum, 277.  
 Ionic composition of pericellular sites, 261.
- Landscape values in forests, 199.  
 Land use and forestry policy, 213.
- Management, historical, 69.  
 Membrane electrostatic-interactions, 273.  
 Mucopolysaccharides, protective action of, 325.
- Opabinia regalis*, 1.
- Parks and forests, recreation planning, 179.  
 Pericellular environment, 315, 363.  
 Planning – forestry and land use, 213.  
 Planning – the place of forestry in landscape planning, 199.  
 Prebiotic evolution of connective tissue, 235.  
 Primary matrix, 139.  
 Production of wood in Britain, 101.  
 Prospects: wood or other materials, 91.  
 Proteoglycans synthesis by chondrocytes and the effect of hyaluronic acid, 283.
- Recognition macromolecules, 379.  
 Recreation planning, economic evaluation, 179.
- Sarcoplasmic reticulum in flea jumping muscle, 491.  
 Selection, of proteins – possible role of cell surface, 396.  
 Soil changes under forest, 149.  
 Sulphate turnover in articular cartilage (*in vivo* and *in vitro*), 293.  
 Supplies – in medium term trends, 81.
- Transport, of proteins across chorioallantoic placenta, yolk sac and gut, 395.

Tree species, influences on soil, 149.

Turnover of glycosaminoglycans in articular cartilage (*in vivo* and *in vitro*), 293.

Ultrastructure, 243.

Ultrastructure of flea jumping muscle, 491.

Wildlife and forests, 163.

Wood: long term prospects, 91.

*Xenopsylla cheopis*, execution of the jump and activity, 491.

*Xenopsylla cheopis*, exoskeletal structures and musculature, 457.

Yield improvement by breeding, 115.

Yield improvement by site amelioration, 115.

*End of the two hundred and seventy-first volume – Series B*
