

and scirrous. He saith, he cut it athwart, and found the inner Substance of it very full of Vessels, of which he founded many, and found, that though it was hard, yet it was very full of Pipes running thorough it, which made him at first imagine, that as the Spermatique and Hypogastrique Channels of a breeding Woman grew big in proportion, that the *Embyro* is nourish'd; so these Hypogastrique Veins and Arteries of the Bladder, were all dilated and widened to feed these *Caruncles*, which from thence, as their *placenta*, drew all their nourishment: But when he saw that these Tubes did far exceed their ordinary number, he believed, that this was from thence, because that each capillary Branch, whose smallness doth commonly hide them from us, was much stretch'd in this Case, to furnish this *Matrix*, (if it may be so called) with more Blood than ordinary.

Errata in *Numb.* 126.
