

the *murex* and *buccina* ownes that in the spring they use to get together and produce a substance like a hony comb full of little bodyes as big as white Vetches; which may be thought to be their Eggs. As to the 4<sup>th</sup>. of the Fathers observations, he sayes he will say nothing, but confine himself to his owne which he thinks he has sufficiently demonstrated.

---

### ERRATA.

*Numb. 151. p. 318. lin. ult. read,* as from its Center diffused round about, it might according to our former calculation in a minutes time have reached the extremity of its Sphere or compafs.
