

*The Method the Indians in Virginia and Carolina use to Dress Buck and Doe Skins ; as it was communicated to the Royal Society by the Honourable Sir Robert Southwell, Knt. their President.*

**T**HE *Felt* being taken off is first streined by Lines, or otherwise, most like the Clothiers Racks, but for no other purpose but to dry them.

The Brains of the Deer, whether *Buck* or *Doe*, is taken out and mesled, and dawbed on Moss or dried Grass, and then dried in the Sun, or by a Fire to preserve them.

When the Hunting time is over, the Women dress the Skins; first, by putting them in a Pond, or Hole of Water, to soak them well. Then they with an old Knife fixed in a Cleft-Stick, force off the Hair, whilst they remain wet. The Hair being taken or forced off, they put as many Skins as they have made so ready, into a Kettle or Earthen Pot, and a proportion of the Deers Brains, before spoken of, into the Kettle with the Skins; and then put them over a Fire till they are more than Blood-warm; which will make them ladder and scour perfectly clean; which done, they with small sticks wrest and twist each Skin as long as they find any Wet to drop from them, letting them remain so wrested some Hours; and then they untwist each Skin, and put them into a sort of a Rack, like a Clothiers Rack (which they fix at every place they come to, with no more Trouble than two small Poles set upright, and two more put a thwart, all fixed with their own Barcks,) and extend them every way by Lines, and as the Skin dries, so they with a dull Hatcher, or a Stick flatted, and brought

brought to a round edge, or a Stone fitted by nature for that purpose, rub them all over to force all the Water and Grease out of them, till they become perfectly dry : which is all they do.

And one Woman will dresse eight or ten Skins in a day ; that is, begin and end them. I intimate this because the Men never do it.

Observationes ponderis Testudinis terrestris, cum in Autumno terram subiret, cum ejusdem ex Terrâ Verno tempore exeuntis pondere comparati, per plures anos repetitæ : experimento celeberrimi D. D. *Georgii Ent*, Equitis, & M. D. & à Doctissimo D. D. *Rob. Pitt*, M. D. & R. S. S. communicatæ.

**D**IE septimo Octobris, Anno 1651. Testudinem meam appendi, priusquam latibulum adiret, ibidem per totam Hyemem hybernatura, pendeatque exactè libras 4. unci-  
àsque totidem minus drachma, nempe lib. 4. unc. 3. drach. 7.

Die octavo Octobris 1652. Erutam è terra Testudinem ( nam se pridie humaverat ) appendi denno, ponderabatque lib. 4. unc. 6. & drach. 1.

Die 16. Martii 165 $\frac{3}{4}$ . Testudo sponte è latibulo suo prodit. Pendeatque lib. 4. atque unc. 4.

Die 4. Octobris 1653. Testudo postquam per aliquot dies jejunasset, subitúsque terram sese abscondisset, inde edueta atque appensa ponderabat lib. 4. unc. 5. Oculi ( quos diu clausos habuerat ) tum aperti plurimum madescebant.

Die 18. Martii. 165 $\frac{3}{4}$ . Testudo è latebris prodians & in lance appensa ponderabat lib. 4. unc. 4. & drach. 2.
