**T**Here having been lately Propofed by Subscription, Mr RAY's third and laft Vol. of his *HISTORY* of *PLANTS*, whereby that whole Work is compleated, containing more Plants, and Description of new *Species*, than all the Books yet extant on that fubject; many hundreds being communicated from the Streights of *Magellau*, the *Philippine Iflands*, and feveral Countries never fearch'd of Plants before. By *F. Georgio Camelli* and other *Virtuof*, who either refide, or have made careful remarks in the refpective places; all difpos'd in an eafy method, to be found by their Tribes and Characterifticks; with an account of fuch parts of them as are either Specificks for fome Difeaſes, as the *Peruvian Bark*, &c. or are Univerfal Medicines, as *Faba St Igyatij*, &c. beſide many peculiarities belonging to particular Plants, every where occurring in the Work. The ſame is already far advanced at the Preſs, and will be finiſhed about the 25th day of *March* next, by the Undertakers *SAM. SMITH* and *BENJ. WALFORD*, Printers to the Royal Society, at the *Prince's Arms* in *St Paul's Church-yard*.
