III. Some farther Observations relating to the Antiquities and Natural History of Ireland. In a Letter from the late Mr. Edw. Lhwyd, Keeper of the Ashmolean Museum in Oxford, to Dr. Tancred Robinson, F. R. S.

Pensans, in Cornwall, Aug. 25, 1700:

Honoured Sir.

OR Antiquities, Ireland affords no great variety at least it was not our fortune to be much diverted that way. I have in divers Parts of the Kingdom picked up about 20 or 30 Irish Manuscripts on Parchment: But the Ignorance of their Criticks is such, that tho' I confulted the chiefest of them, as O Flaberty (Author of the Ogygia) and several others, they could scarce interpret one Page of all my Manuscripts; and this is occasioned by the want of a Dictionary, which it feems none of their Nation ever took the trouble to compole. I was informed (but how truly I know not) they have lately printed one at the Irish College in Lovain; which if I could procure, I should not despair of being in a thort time able myself to understand these Manuscripts: the many of them being but infignificant Romances, it would fearce quit the Pains. What I most value amongst them are their old Laws, which might give fome Light to the Curious as to many of their National Cultoms 3 and some of their old Poems: But all are of the to any that would compole a Dictionary of their Language; which was anciently (confidering the narrowness of their Knowledge as to Arts and Sciences) doubtless very copious...

I saw no Coins found there, but the Roman Gold Coin of Valentinian jun. formerly mentioned; several of our old English since the Conquest; and one cass Brass Piece inscribed with Runic Letters, which I take to have been a Danish Amulet.

Several of our old British Monuments, called Kaer, Karn, Cromleeb, &c. we met with; and found that they

distinguished them by the same Names.

What were peculiar to themselves, were their high round Towers for Belfreys; their round Entrenchments, commonly called *Danes* Rathes; and the Elf-Arrow Heads of Flint.

About Slego and Bali Shany we had good success as to Figur'd Stones; where we met with variety of Astropodia and Astrorrhiza, or Modieli, not yet sigured or described, together with other Curiosities in that kind; all which (together with the Manuscripts) I have long since sent to Oxford.

In the same Neighbourhood, on the Mountains of Benz Bulben and Ben Buishgen, we met with a Number of the rare Mountain Plants of England and Wales, and three or four not yet discover'd in Britain. Mr. Heaton's Chamadrys Alpina is a common Plant on those Hills, as also on divers other Mountains and Heathy Grounds in Connacht and Munster.

In the Isle of Aran (near Galloway) we found great plenty of the Adianthum verum, and a fort of matted Campion with a white Flower, which I bewail the Loss of; for an imperfect Sprig of it was only brought me; and I waited afterwards in Rain almost a whole Week for fair Weather, to have gone in quest of it.

In most of the Mountains of Galloway and Mayo grows an elegant fort of Heath, bearing large Thyme-leaves, a Spike of fair purple Flowers like some Campanula, and viscous Stalks. I know not whether it be any thing related to the Cifi Ladanifer as

Tax:

In the same Places Pinguicula flore carneo minore is a common Plant, and a sort of Ros Solis, which I take to be undescribed.

Sedum serratum folis pediculis oblongis insidentibus is exceeding common on all the Mountainous Tracts of

Mayo, Galloway, and Keri.

On the Mountains of Keri, Sanicula guttata grows in abundance; together with some other rare Plants, as the Arbutus. Cotyledon hirsuta. Cirsum humile montanum Cynoglossi folio polyanthemum R. Syn. Alchimilla Alpina pentaphyllos. Sanicula aizoides inter guttatam & Sedum serratum ambigens. Veronica procumbens maxima, an N. D? &c. But the Tories frustrated our Curiosity here, tho no where else in the Kingdom.

Pentaphylloides fruticosa we found plentifully amongst Lime-Stone Rocks on the Banks of Loch Crib in the County of Calloway; and Dr. Merret's Vaccinia rubra foliis Myrtinis crispis (a very beautiful Plant) we found

to be no rarity in this Kingdom.

We have preserved of all these, and some more I have not time to mention; as also of such Marine Plants as had not occur'd in Wales.

We met with some Marine Animals of the Exanguious kind, that were Strangers to us; and have preserved by Figures and dried Paterns what we could.—— I am,

Honoured Sir,

Your Obedient humble Servant,

E. LHWYD.
