

“ Body. Then with a green Stick, which he had in
 “ his Hand, about a Foot an half long, the Bark be-
 “ ing newly peel'd off, urged and provoked the Head,
 “ 'till it bit the Stick in fury several times. Upon this
 “ the Colonel observed finall green Streaks to rise up
 “ along the Stick towards his Hand. He threw the
 “ Stick upon the Ground, and in a quarter of an
 “ Hour, the Stick of its own accord split into feve-
 “ ral Pieces, and fell afunder from end to end. This
 “ Account I had from him again at the Writing
 “ hereof.” [*Beverley's History of Virginia*, from
 pag. 260, to 267.]

Father *Labat* likewise tells us (in his *Nouveau Voyage aux Isles de l' Amerique*, Tom. IV. pag. 96, and 106. Ed. Paris, 1722. in 8°.) that Serpents, when they bite their Prey, retire, to avoid being hurt by them; and when dead, cover them with their Spittle, extend their Feet along their Sides and Tails, if Quadrupeds, and then swallow them.

II. *Part of a Letter from Dr. Richardson, F. R. S. to Sir Hans Sloane, Bart. President of the Royal Society, and Colleg. Physic. concerning the Squilla aquæ dulcis.*

I Have met with very little of late in Natural History worth mentioning to you. One Thing I cannot omit, which I do not remember is taken notice of by any Naturalist; that is, the great Destruction that is made amongst the small Fry of Fish by the *Squilla aquæ dulcis*, which abound in most
 X x 2 standing

standing Waters. In a small breeding Pond nigh my House, where I had formerly plenty of small Carp and Tench every Year, and of late scarce any young Breed to be met with, my Gardener not long ago observed one of the *Squilla*, with a Carp in its Mouth almost as large as itself; and has since observed these Insects hunting amongst the Weeds, and vigorously pursuing the small Fry. I order'd the Gardener to catch some of these Insects, and bring them home alive, with some of the smallest Fish he could meet with. We put them together in a large Bason of Water. The Insects were so rapacious, that they fell upon the Fish immediately, and destroy'd several in my Sight; and before Morning had devoured all that were in the Bason.

North-Eierley,
Sept. 5, 1733.

RICHARD RICHARDSON.
