

Theory of Electromagnetic Properties of Superconducting and Normal Systems. I. Sang Boo Nam [Phys. Rev. 156, 470 (1967)]. The lower limit of

the first integral in Eq. (4.35b) should be $\omega_g - \omega$ instead of $[\omega_g - \omega, -\omega_g]$. The statement below Eq. (4.35b) "Here $[\omega_g - \omega, -\omega_g]$ denotes that the algebraically largest of two numbers is to be used," should be deleted. The same correction should be made in the Eq. (1.5b) in the subsequent paper [Phys. Rev. 156, 487 (1967)].
