Announcement: Reduction in Page Charges

The economies resulting from the transfer of the *Physical Review* from monotype printing to typewriter composition have made it possible to reduce the publication charge of all sections of the *Physical Review* from \$70 per page to \$65 per page, effective with the issues of June 1971. (The charge for advance publication of the abstract in *Physical Review Abstracts* will remain at \$15.)

The switch to typewriter composition has also resulted in a reduction in the time lag between date of acceptance and date of publication.
