This paper was published online on 23 June 2008 with typographic errors in two references. In Ref. 15, the correct journal title should be “Phys. Rev. (Series I)”. In the note of Ref. 16, the first sentence should read as “The low-field susceptibility of spherical Co or CoFe particles is $3/4\pi$ emu/cm³=0.031 emu/g.” The article has been corrected as of 27 June 2008. The article is correct in the printed version of the journal.
