This paper was published online on 3 December 2009 with an incomplete figure. Figure 5 has been replaced as of 18 December 2009. In addition, the captions to Figs. 1 and 5 contain errors. The caption to Fig. 1 should read “Specific heat $C(T, H)$ anomaly in undoped SmFeAsO for different magnetic field strengths. A critical field B_c can be defined at the maximum of peak for fields $B < 16$ T.” The third sentence of the caption to Fig. 5 should read “The midpoint of the high-temperature $C(T)$ increase is taken to define the high-temperature edge of the transition (circles)....” The figure and captions are correct in the printed version of the journal.
