In this Rapid Communication, we mistakenly showed the magnitude of the applied electric field to be  $2 \times 10^4$  kV/cm. It appears on: (1) page 140102-3, right column, line 14, and (2) page 140102-4, left column, line 24. The correct value of the applied electric field is  $2 \times 10^4$  V/cm. This error does not affect any results and conclusions of the paper.
