This paper was published online on 10 August 2010 with an omission in the captions of Figs. 4 and 5. The last sentence of the captions should read as “The dashed lines represent momentum distributions calculated in absence of nonharmonic contributions, i.e., with excess kurtosis set to zero and other moments of the Gram-Charlier expansion unchanged.” The captions have been corrected as of 16 August 2010. The captions are correct in the printed version of the journal.
