Erratum: Next-to-leading order corrections to heavy flavor production in longitudinally polarized photon-nucleon collisions
[Phys. Rev. D 62, 114509 (2000)]

Z. Merebashvili, A. P. Contogouris, and G. Grispos

We would like to correct several typos that were made while preparing the manuscript for publication.

(i) The right-hand side of Eq. (3.6) should be multiplied by a factor of 2: e.g.,

$$F(\varepsilon) \equiv 2K_L \mu^{2\varepsilon} \dots, \tag{1}$$

and at the same time the right-hand sides of Eqs. (3.5) and (3.9) should be divided by 2.

(ii) The third term on the right-hand side of Eq. (5.1) should have a minus sign, e.g., $\dots - e_Q e_q Q_3$. Also, in the definition for L after Eq. (5.6) the quantity $\tilde{s}_2$ is

$$\tilde{s}_2 = 2\pi s_2. \tag{2}$$

(iii) There is a missing overall color factor N_C that should multiply expressions for the splitting functions $\Delta P_{q\gamma}^n$ and $P_{q\gamma}^n$ just before Eq. (5.8).

(iv) There is an obvious typo in Eq. (B2) for the coefficient $\tilde{f}_6$, where the division sign is missing on the second line in term $s_2 u$:

$$s_2 u \rightarrow s_2/u. \tag{3}$$

(v) Finally, in Eq. (2.8) the parameter M in $C_\varepsilon(M)$ should be replaced by a renormalization mass μ.

Of course, all of our results and conclusions throughout the paper remain unchanged, as we used the correct expressions in our computer programs.

We thank G. Kramer and H. Spiesberger for drawing our attention to the first four points above.
