

EDITORIAL NOTE

Comment on “Constraints on biological effects of weak extremely-low-frequency electromagnetic fields”**[Phys. Rev. A 46, 2178 (1992)]****Joseph L. Kirschvink****Reply to “Comment on ‘Constraints on biological effects of weak extremely-low-frequency electromagnetic fields’”****[Phys. Rev. A 46, 2185 (1992)]****Robert K. Adair**

We wish to acknowledge editorial errors in connection with the abstract of the Comment, and indirectly, the Reply as well. The Comment was originally submitted without an abstract; Dr. Adair submitted his Reply without his having seen the abstract, which was submitted later. It is possible that the Reply would have been different had this not been the case. In addition, we regret that some of the language of the Comment's abstract was rather stronger and more subjective than we usually allow in our journals. We offer our apologies to both authors for these deviations from our usual procedures.
